REQUIRED DISCLOSURES

Views expressed in this newsletter are the current opinion of the author, but not necessarily those of Raymond James & Associates. The author's opinions are subject to change without notice. Information contained in this report was received from sources believed to be reliable, but accuracy is not guaranteed. Past performance is not indicative of future results. This is not a recommendation or a solicitation to buy or sell any security. Investments and strategies mentioned may not be suitable for all investors. Investing always involves risk and you may incur a profit or loss. No investment strategy can guarantee success. International investing involves additional risks such as currency fluctuations, differing financial accounting standards, and possible political and economic instability. These risks are greater in emerging markets. There is an inverse relationship between interest rate movements and bond prices. Generally, when interest rates rise, bond prices fall and when interest rates fall, bond prices rise. Since past performance is no indication of future results, there are no guarantees as to future performance. Past performance is provided for illustrative purposes only.

Diversification and strategic asset allocation do not ensure a profit or protect against a loss. Investments are subject to market risk, including possible loss of principal. Gross Domestic Product (GDP) is the annual market value of all goods and services produced domestically by the U.S. Alternative investment strategies involve greater risks and are only appropriate for the most sophisticated, knowledgeable and wealthiest of investors. High-yield bonds are not suitable for all investors. When appropriate, these bonds should only comprise a modest portion of your portfolio.

The S&P 500 is an unmanaged index of 500 widely held stocks. The MSCI Emerging Markets Index is designed to measure equity market performance in global emerging markets. The Russell 2000 index is an unmanaged index of small cap securities which generally involve greater risks. Barclays Capital U.S. Aggregate Bond Index is made up of the Barclays Capital U.S. Government / Corporate Bond Index, Mortgage-Backed Securities Index, and Asset-Based Securities Index, including securities that are of investment grade quality or better, have at least one year to maturity, and have an outstanding par value of at least \$100 million. The MSCI EAFE (Europe, Australia, and Far East) index is an unmanaged index that is generally considered representative of the international stock market. These international securities involve additional risks such as currency fluctuations, differing financial accounting standards, and possible political and economic instability. The Dow Jones-UBS Commodity Index aims to

provide broadly diversified representation of commodity markets as an asset class. It is not possible to invest directly in an index. The Vanguard REIT Index is a real estate investment trust fund that offers investors wide exposure in the real estate sector at a low price. The fund holds each of its stocks in approximately the same proportion as the weighting in the MSCI US REIT Index. It is not possible to invest directly in an index.

The NASDAQ Composite Index is an unmanaged index of all stocks traded on the NASDAQ over-the-counter market. The Dow Jones Industrial Average is an unmanaged index of 30 widely held securities.

The value of fixed income securities fluctuates and investors may receive more or less than their original investments if sold prior to maturity. Bonds are subject to price change and availability.

This analysis does not include transaction costs and tax considerations. If included these costs would reduce an investor's return. As federal and state tax rules are subject to frequent changes, you should consult with a qualified tax advisor prior to making any investment decision. Raymond James does not provide legal or tax advice on these or any other transactions.

Raymond James & Associates, Inc., member New York Stock Exchange, makes a market in Facebook, Amazon, Netflix and Google. Investing in small and mid cap stocks are riskier investments which include price volatility, less liquidity and the threat of competition. Investments in the energy sector are not suitable for all investors. Further information regarding these investments is available from your financial advisor.

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and federally registered CFP (with flame logo) in the U.S., which it awards to individuals who successfully complete CFP Board's initial and ongoing certification requirements.
