## THE IMPORTANCE OF TAX PLANNING

Careful planning throughout the year can assist you in reducing the taxes you pay - as well as help you achieve your financial goals. This guide provides an overview of tax rates, credits, deductions and related considerations that may apply to you.

Tax planning should not be done in isolation, but instead should be driven by your overall financial goals and integrated with your total financial plan. By developing and implementing appropriate strategies to lessen or to shift current and future tax liabilities, you can improve your prospects of meeting long- and short-term objectives. For example, accurately projecting your income taxes can help you determine the cash flow available to you in the coming year.

Keep in mind that tax laws are often complex and frequently change. As a consequence, you should consult your tax advisor before making investment and tax decisions.

## 2012 INCOME TAX CHANGES

Americans will not see rate changes on their taxes for 2012 due to the passage of the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 on December 17, 2010. The law extends the Bush-era tax cuts that were scheduled to expire after 2010 and would have affected virtually all aspects of tax code. The new law extends the cuts through 2012. However, be aware that many changes will occur in 2013 if nothing is done to extend the cuts. The brackets will all be higher, the capital gains and dividend rates will all be higher, the estate tax will undergo major changes and other provisions will occur.

## ESTATE TAX

The estate tax was revived in 2011 and is reunified with the gift tax. The maximum tax rate is $35 \%$ with an applicable exclusion amount of $\$ 5,120,000$ for 2012.

The 2010 modified carryover basis rules are once again replaced with the step up in basis rules that had applied until 2010. For estates of decedents dying in 2010, there is an option to elect not to apply the step-up basis rules (item A), but instead use the modified carryover basis rules (item B):
A. The estate tax based on the new $35 \%$ top rate and the $\$ 5,000,000$ exemption with a stepped up basis, or
B. No estate tax and use the modified carryover basis rules which limit the step up to $\$ 1.3$ million for the overall estate, plus $\$ 3$ million for assets transferred to a surviving spouse.

Another new twist to the estate tax is the portability between spouses of the unused exclusion. With portability, a surviving spouse could elect to use the unused portion of the estate tax exclusion of his or her predeceased spouse if the election is made on a timely filed estate tax return.

## 2012 TAX RATES

Taxable income is income after all deductions, including either itemized deductions or the standard deduction, and exemptions.

*The gains are included in determining tax bracket.

## NETTING PROCESS

Determine whether you have a net short-term or net long-term capital gain or loss on the sale of stock.

1. Net your short-term gains and short-term losses.
2. Net your long-term gains and long-term losses.
3. Net your short-term gain/loss against long-term gain/loss.
4. For gains, you must pay tax on all gains each year. For losses, you may only deduct up to $\$ 3,000$ of excess losses against ordinary income per year.
5. Carry over any remaining losses to future tax years.

## Child Tax Credit

| Year | Tax Credit |
| :---: | :---: |
| 2012 | $\$ 1,000$ per eligible child |

## KIDDIE TAX RULES

The Kiddie Tax rules require the unearned income of a child or young adult be taxed at the greater of the child's or parents' marginal tax bracket once the unearned income exceeds $\$ 1,900$. Under the Kiddie Tax rules, the first $\$ 950$ in unearned income is not subject to tax. The next $\$ 950$ of unearned income is taxed at the child's rate (typically 10\%). Then, any unearned income of more than $\$ 1,900$ is taxed at the parents' marginal rate. The Kiddie Tax rules apply to unearned income of the following:

- A child under age 18 at the end of each tax year
- An 18-year-old whose earned income does not exceed one-half of his or her support
- A 19- to 23 -year-old full-time student whose earned income does not exceed one-half of his or her support

## EDUCATION

Contribution amounts to Coverdell: \$2,000; extended through 2012. Reduction between \$95,000 - \$110,000 for single filers and \$190,000 $\$ 220,000$ for married filing jointly.

Contribution amounts to 529 Plan: Contributions can be front loaded up to $\$ 65,000$; $\$ 130,000$ for married couples in one year qualifies as a present interest gift. No additional contributions allowed for the next four years.

## Education Credits

Student loan interest deduction: \$2,500 above the line deduction. Reduction for MAGI between \$60,000 - \$75,000 for single filers and \$125,000 $\$ 155,000$ for married filing jointly.

Modified AGI-U.S. savings bonds interest exclusion:* \$72,850 - \$87,850 for single filers; \$109,250 - \$139,250 for married filing jointly.
*Bonds must be titled in the name of parents only, owner must be age 24 or older at the time of issue, proceeds must be used for qualified postsecondary education expenses of the taxpayer, spouse or dependent.

## INDIVIDUAL RETIREMENT ACCOUNTS

Generally, traditional IRA contributions are fully deductible unless you or your spouse are covered by a workplace retirement plan, in which case the following deduction phase-outs apply.

Traditional IRA: Deductibility of Contributions

| Status | Modified Adjusted <br> Gross Income | Deduction <br> Married <br> Filing <br> Jointly* |
| :--- | :--- | :--- |
|  | $\$ 0-92,000$ |  |

|  | $173,000-183,000$ | Partial |
|  | More than 183,000 | None |

[^1]
## Roth IRA: Eligibility of Contributions

Contributions made to a Roth IRA are not deductible, unlike contributions made to a traditional IRA, and there is no age restriction on making contributions. An individual may contribute up to $\$ 5,000$ to the Roth IRA, subject to income phase-out limits.

| Status | Adjusted Gross Income | Contribution |
| :---: | :---: | :---: |
| Married Filing Jointly | \$0-173,000 | \$5,000 Maximum |
|  | 173,000-183,000 | Partial |
|  | More than 183,000 | None |
| Single | \$0-110,000 | \$5,000 Maximum |
|  | 110,000-125,000 | Partial |
|  | More than 125,000 | None |

## Catch-Up Contributions

If you have either a traditional or Roth IRA and attain age 50 or older during the tax year, an additional $\$ 1,000$ may be contributed.

## IRA \& Roth Contribution

## UNIFORM LIFETIME TABLE

For the majority of IRA participants, the following table is used for determining a participant's required minimum distributions (RMDs). There is an exception when a spousal beneficiary is more than 10 years younger than the participant and is the sole beneficiary on January 1. In this case, a different table is used.

To calculate your RMD, first find the age you will turn in 2012 and the corresponding applicable divisor. Then divide the prior year-end balance of your IRA account by the divisor. The resulting number is the dollar figure you will need to remove from your IRA to meet your RMD for the current year.

For example, if you are now 82, your applicable divisor is 17.1. If the balance in your IRA as of December 31 of last year was $\$ 235,000$, divide that amount by 17.1. The result is $\$ 13,742.69$. This is the amount of your RMD for the current year.

## PRESENT VALUE OF A LUMP SUM

What if you know you will need $\$ 10,000$ accumulated 10 years from now? How much money do you need to invest today at an average interest rate of $8 \%$ to obtain your goal? Looking at the table below, go to 10 years and then across to $8 \%$. You see that $\$ 0.463$ invested today at $8 \%$ should yield $\$ 1$ in 10 years. Since you want $\$ 10,000$, multiply $\$ 0.463$ by $\$ 10,000$ to arrive at $\$ 4,630$.

| Years | $5 \%$ | $6 \%$ | $8 \%$ | $10 \%$ | $12 \%$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 10 | .614 | .558 | .463 | .386 | .322 |
| 20 | .377 | .312 | .215 | .149 | .104 |
| 30 | .231 | .174 | .099 | .057 | .033 |
| 40 | .142 | .097 | .046 | .022 | .011 |

## FUTURE VALUE OF A LUMP SUM

If you invest $\$ 10,000$ at an interest rate of $8 \%$, how much will your investment be worth in 10 years? By referring to the table, you find that $\$ 1$ invested today at $8 \%$ would grow to $\$ 2.159$ in 10 years. Since you invested $\$ 10,000$, multiply $\$ 2.159$ by $\$ 10,000$, giving you $\$ 21,590$.

| Years | $5 \%$ | $6 \%$ | $8 \%$ | $10 \%$ | $12 \%$ |

## PRESENT VALUE OF A SERIES

## OF ANNUAL PAYMENTS

How much money would you need to invest today at an interest rate of $8 \%$ to provide $\$ 10,000$ per year for 10 years? Looking at the chart below, to receive \$1 per year for 10 years at $8 \%$, you would need to invest $\$ 6.710$. Multiply that figure by $\$ 10,000$ to get $\$ 67,100$, the amount which you would need to invest.

| Years | $5 \%$ | $6 \%$ | $8 \%$ | $10 \%$ | $12 \%$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 10 | 7.722 | 7.360 | 6.710 | 6.144 | 5.650 |

| 30 | 15.372 | 13.765 | 11.258 | 9.427 | 8.055 |
| 40 | 17.159 | 15.046 | 11.925 | 9.779 | 8.244 |

## FUTURE VALUE OF A SERIES

 OF ANNUAL PAYMENTSIf you deposit \$5,000 in an annuity at the end of each year for 10 years at an $8 \%$ interest rate, you would have $\$ 72,435$ ( $\$ 5,000 \times \$ 14.487$ ) in your account at the end of the 10th year.
