NOTES TO STATEMENT OF FINANCIAL CONDITION

(Unaudited)

March 31, 2022

NOTE 1 – ORGANIZATION AND BASIS OF PRESENTATION

Organization

Raymond James & Associates, Inc. (“RJ&A,” “we,” “our,” “us,” or the “firm”), a wholly owned subsidiary of Raymond James Financial, Inc. (“RJF” or “Parent”), is engaged in various financial services activities, including providing investment management services to retail and institutional clients, merger & acquisition and advisory services, the underwriting, distribution, trading and brokerage of equity and debt securities, the sale of mutual funds and other investment products, and clearing services for both affiliated broker-dealers such as Raymond James Financial Services, Inc. (“RJFS”), a wholly owned subsidiary of RJF, and unaffiliated broker-dealers. RJ&A is registered with the Securities and Exchange Commission and is registered as a Municipal Advisor with the Municipal Securities Rulemaking Board. We are a member of the Financial Industry Regulatory Authority (“FINRA”), National Futures Association (“NFA”) and various exchanges. Through our membership in the NFA, we are regulated by the Commodity Futures Trading Commission.

Basis of presentation

Accounting estimates and assumptions

We conform to our Parent’s fiscal year end of September 30. The preparation of the Statement of Financial Condition in conformity with United States (“U.S.”) generally accepted accounting principles (“GAAP”) requires us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities as well as the disclosure of contingent assets and liabilities at the date of the Statement of Financial Condition. Actual results could differ from those estimates and could have a material impact on the Statement of Financial Condition.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Cash and cash equivalents

Our cash equivalents include money market funds or highly liquid investments with maturities of 3 months or less as of our date of purchase, other than those used for trading purposes.

Assets segregated for regulatory purposes

In accordance with Rule 15c3-3 of the Securities Exchange Act of 1934, RJ&A, as a broker-dealer carrying client accounts, is subject to requirements to maintain cash or qualified securities on deposit in a segregated reserve account for the exclusive benefit of its clients. Such amounts are included in “Assets segregated for regulatory purposes” on our Statement of Financial Condition. These amounts include cash and cash equivalents, which represent highly liquid investments with maturities of 3 months or less as of our date of purchase (amounts as of March 31, 2022 included \$650 million of U.S. Treasury securities (“U.S. Treasuries”) with maturities of 3 months or less as of our date of purchase), and highly liquid securities, such as U.S. Treasuries, which have maturities of greater than 3 months as of our date of purchase (\$10.39 billion as of March 31, 2022). Such securities are carried at fair value on our Statement of Financial Condition.

Collateralized agreements and financings

Securities purchased under agreements to resell and securities sold under agreements to repurchase

We purchase securities under short-term agreements to resell (“reverse repurchase agreements”). Additionally, we sell securities under agreements to repurchase (“repurchase agreements”). Reverse repurchase agreements and repurchase agreements are accounted for as collateralized agreements and collateralized financings, respectively, and are carried at contractual amounts plus accrued interest. We receive collateral with a fair value that is typically equal to or in excess of the principal amount loaned under reverse repurchase agreements to mitigate credit exposure. To ensure that the market value of the underlying collateral remains sufficient, collateral values are evaluated on a daily basis, and collateral is obtained from or

RAYMOND JAMES & ASSOCIATES, INC.

Notes to Statement of Financial Condition (Unaudited)

returned to the counterparty when contractually required. Under repurchase agreements, we are required to post collateral in an amount that typically exceeds the carrying value of these agreements. In the event that the market value of the securities we pledge as collateral declines, we may have to post additional collateral or reduce borrowing amounts. Reverse repurchase agreements and repurchase agreements are included in “Collateralized agreements” and “Collateralized financings,” respectively, on our Statement of Financial Condition. See Note 5 for additional information regarding collateralized agreements and financings.

Securities borrowed and securities loaned

We act as an intermediary between broker-dealers and other financial institutions whereby we borrow securities from one broker-dealer and then either lend them to another broker-dealer or use them in our broker-dealer operations to cover short positions. Where permitted, we have also loaned, to broker-dealers and other financial institutions, securities owned by the firm, our clients, or others we have received as collateral. Securities borrowed and securities loaned transactions are accounted for as collateralized agreements and collateralized financings, respectively, and are recorded at the amount of cash advanced or received. In securities borrowed transactions, we are required to deposit cash with the lender in an amount which is generally in excess of the market value of securities borrowed. With respect to securities loaned, we generally receive cash in an amount in excess of the market value of securities loaned. We evaluate the market value of securities borrowed and loaned on a daily basis, with additional collateral obtained or refunded as necessary. Securities borrowed and securities loaned are included in “Collateralized agreements” and “Collateralized financings,” respectively, on our Statement of Financial Condition. See Note 5 for additional information regarding collateralized agreements and financings.

Financial instruments, financial instrument liabilities, at fair value

“Financial instruments” and “Financial instrument liabilities” are recorded at fair value. Fair value is defined by GAAP as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date in the principal or most advantageous market for the asset or liability.

In determining the fair value of our financial instruments in accordance with GAAP, we use various valuation approaches, including market and/or income approaches. Fair value is a market-based measurement considered from the perspective of a market participant. As such, our fair value measurements reflect assumptions that we believe market participants would use in pricing the asset or liability at the measurement date. GAAP provides for the following three levels to be used to classify our fair value measurements.

Level 1 - Financial instruments included in Level 1 are highly liquid instruments valued using unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Financial instruments reported in Level 2 include those that have pricing inputs that are other than unadjusted quoted prices in active markets, but which are either directly or indirectly observable as of the reporting date (i.e., prices for similar instruments).

Level 3 - Financial instruments reported in Level 3 have little, if any, market activity and are measured using one or more inputs that are significant to the fair value measurement and unobservable. These valuations require judgment or estimation. These instruments are generally valued using discounted cash flow techniques.

GAAP requires that we maximize the use of observable inputs and minimize the use of unobservable inputs when performing our fair value measurements. The availability of observable inputs can vary from instrument to instrument and, in certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an instrument’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement of an instrument requires judgment and consideration of factors specific to the instrument.

Valuation techniques and inputs

The fair values for certain of our financial instruments are derived using pricing models and other valuation techniques that involve management judgment. The price transparency of financial instruments is a key determinant of the degree of judgment involved in determining the fair value of our financial instruments. Financial instruments which are actively traded will generally have a higher degree of price transparency than financial instruments that are less frequently traded. In accordance with GAAP, the criteria used to determine whether the market for a financial instrument is active or inactive is based on the particular asset or liability. For equity securities, our definition of actively traded is based on average daily trading volume.

RAYMOND JAMES & ASSOCIATES, INC.

Notes to Statement of Financial Condition (Unaudited)

We have determined the market for certain other types of financial instruments to be uncertain or inactive as of March 31, 2022. As a result, the valuation of these financial instruments included management judgment in determining the relevance and reliability of market information available.

The level within the fair value hierarchy, specific valuation techniques, and other significant accounting policies pertaining to financial instruments at fair value on our Statement of Financial Condition are described as follows.

Trading assets and trading liabilities

Trading assets and trading liabilities include debt securities, equity securities, brokered certificates of deposit, and other financial instruments. These instruments are recorded at fair value.

When available, we use quoted prices in active markets to determine the fair value of our trading assets and trading liabilities. Such instruments are classified within Level 1 of the fair value hierarchy.

When trading instruments are traded in secondary markets and quoted market prices for identical instruments do not exist, we utilize valuation techniques, including matrix pricing, to estimate fair value. Matrix pricing generally utilizes spread-based models periodically re-calibrated to observable inputs such as market trades or to dealer price bids in similar securities in order to derive the fair value of the instruments. Valuation techniques may also rely on other observable inputs such as yield curves, interest rates and expected principal prepayments and default probabilities. We utilize prices from third-party pricing services to corroborate our estimates of fair value. Depending upon the type of security, the pricing service may provide a listed price, a matrix price or use other methods including broker-dealer price quotations. Securities valued using these techniques are classified within Level 2 of the fair value hierarchy.

We offset our long and short positions for identical securities recorded at fair value as part of our trading assets (long positions) and trading liabilities (short positions).

Derivative assets and derivative liabilities

Our derivative assets and derivative liabilities are recorded at fair value and are included in “Derivative assets” and “Derivative liabilities” on our Statement of Financial Condition. To reduce credit exposure on certain of our derivative transactions, we may enter into a master netting arrangement that allows for net settlement of all derivative transactions with each counterparty. In addition, the credit support annex allows parties to the master netting agreement to mitigate their credit risk by requiring the party which is out of the money to post collateral. We accept collateral in the form of cash or other marketable securities. Where permitted, we elect to net-by-counterparty certain derivatives entered into under a legally enforceable master netting agreement and, therefore, the fair value of those derivatives are netted by counterparty on our Statement of Financial Condition. As we elect to net-by-counterparty the fair value of such derivatives, we also net-by-counterparty cash collateral exchanged as part of those derivative agreements. We may also require certain counterparties to make a deposit at the inception of a derivative agreement, referred to as “initial margin.” This initial margin is included in “Other payables” on our Statement of Financial Condition.

We enter into to-be-announced (“TBA”) security contracts in our fixed income business to facilitate client transactions or to actively manage risk exposures that arise from our client activity, including a portion of our trading inventory. Such TBAs are accounted for as derivatives. We use quoted prices in active markets to determine the fair value of the TBA securities, which are classified within Level 1 of the fair value hierarchy.

Other investments

Other investments consist primarily of securities pledged as collateral with clearing organizations and are recorded at fair value. Our securities pledged as collateral with clearing organizations, which primarily include U.S. Treasuries, are categorized within Level 1 of the fair value hierarchy.

Brokerage client receivables, net

Brokerage client receivables include amounts due on cash and margin transactions, which are generally collateralized by securities owned by the clients. Brokerage client receivables are reported at their outstanding principal balance, net of any allowance for credit losses. See the “Allowance for credit losses” section below for the application of the practical expedient under the current expected credit losses (“CECL”) guidance for financial assets secured by collateral. Our allowance for credit losses was insignificant as of March 31, 2022.

Securities beneficially owned by clients, including those that collateralize margin or other similar transactions, are not reflected on our Statement of Financial Condition. See Note 5 for additional information regarding this collateral.

Receivables from brokers, dealers and clearing organizations, net

Receivables from brokers, dealers and clearing organizations primarily consist of deposits placed with clearing organizations, which includes initial margin, and receivables related to sales of securities which have traded but not yet settled including amounts receivable for securities failed to deliver. We evaluate “Receivables from brokers, dealers and clearing organizations,” to estimate an allowance for credit losses. However, these receivables generally have minimal credit risk due to the low probability of clearing organization default and the short-term nature of receivables related to securities settlements and therefore, the allowance for credit losses on such receivables is not significant. Any allowance for credit losses for these receivables is estimated using assumptions based on historical experience, current facts and other factors. We update these estimates through periodic evaluations against actual trends experienced. See Note 6 for additional information regarding these receivables.

Other receivables, net

Other receivables primarily include accrued fees from product sponsors and receivables related to Raymond James Bank Deposit Program client deposit settlements from various banking partners. Net receivables arising from revenues in scope of the accounting guidance for revenue from contracts with customers were \$229 million as of March 31, 2022. We present “Other receivables, net” on our Statement of Financial Condition, net of any allowance for credit losses. Any allowance for credit losses for other receivables is estimated using assumptions based on historical experience, current facts and other factors. We update these estimates through periodic evaluations against actual trends experienced. Our allowance for credit losses was insignificant as of March 31, 2022.

As permitted under the CECL guidance, we include accrued interest receivables related to our financial assets in “Other receivables, net” on the Statement of Financial Condition instead of with the related financial instrument. We reverse any uncollectible accrued interest when the related financial asset is moved to nonaccrual status. Given that we write off uncollectible amounts in a timely manner, we do not recognize an allowance for credit losses related to accrued interest receivable.

Loans to financial advisors, net

We offer loans to financial advisors for recruiting and retention purposes. The decision to extend credit to a financial advisor or other key revenue producer is generally based on their ability to generate future revenues. Loans offered are generally repaid over a five to ten year period and are contingent upon affiliation with us (i.e., whether the advisor is actively affiliated with us or has terminated affiliation with us). These loans are not assignable by the financial advisor and may only be assigned by us to a successor in interest. In the event that the financial advisor is no longer affiliated with us, any unpaid balance of such loan becomes immediately due and payable to us and generally does not continue to accrue interest. Based upon the nature of these financing receivables, affiliation status is the primary credit risk factor within this portfolio. We present the outstanding balance of loans to financial advisors on our Statement of Financial Condition, net of the allowance for credit losses. Refer to the allowance for credit losses section that follows for further information related to our allowance for credit losses on our loans to financial advisors. See Note 7 for additional information on our loans to financial advisors.

Loans for financial advisors who are actively affiliated with us are considered past due once they are 30 days or more delinquent as to the payment of contractual interest or principal. Such loans are placed on nonaccrual status when we determine that full payment of contractual principal and interest is in doubt, or the loan is past due 180 days or more as to contractual interest or principal. When a loan is placed on nonaccrual status, the accrued and unpaid interest receivable is written-off. Loans are returned to an accrual status when the loans have been brought contractually current with the original terms and have been maintained on a current basis for a reasonable period, generally six months.

When we determine that it is likely a loan will not be collected in full, the loan is evaluated for a potential write down of the carrying value. After consideration of the borrower’s ability to restructure the loan, sources of repayment, and other factors affecting the borrower’s ability to repay the debt, the portion of the loan deemed a confirmed loss, if any, is charged-off. A charge-off is taken against the allowance for credit losses for the difference between the amortized cost and the amount we estimate will ultimately be collected. Additional charge-offs are taken if there is an adverse change in the expected cash flows.

Allowance for credit losses

We evaluate loans to financial advisors and certain other financial assets to estimate an allowance for credit losses over the remaining life of the financial instrument. The remaining life of our financial assets is determined by considering contractual terms and expected prepayments, among other factors.

We use multiple methodologies in estimating an allowance for credit losses and our approaches differ by type of financial asset and the risk characteristics within each financial asset type. For certain of our financial assets with collateral maintenance provisions (e.g., collateralized agreements and margin loans), we apply the practical expedient allowed under the CECL guidance in estimating an allowance for credit losses. We reasonably expect that borrowers (or counterparties, as applicable) will replenish the collateral as required. As a result, we estimate zero credit losses to the extent that the fair value equals or exceeds the related carrying value of the financial asset. When the fair value of the collateral securing the financial asset is less than the carrying value, qualitative factors such as historical experience (adjusted for current risk characteristics and economic conditions) as well as reasonable and supportable forecasts are considered in estimating the allowance for credit losses on the unsecured portion of the financial asset.

The allowance for credit losses on loans to financial advisors is estimated using credit risk models that incorporate average annual loan-level loss rates and estimated prepayments based on historical data. The qualitative component of our estimate considers internal and external factors that are not incorporated into the quantitative estimate such as the reasonable and supportable forecast period. In estimating an allowance for credit losses on our individually-evaluated loans to financial advisors, we generally take into account the affiliation status of the financial advisor (i.e., whether the advisor is actively affiliated with us or has terminated affiliation with us), the borrower's ability to restructure the loan, sources of repayment, and other factors affecting the borrower's ability to repay the debt.

Credit losses are charged-off against the allowance when we believe the uncollectibility of the financial asset is confirmed. Subsequent recoveries, if any, are credited to the allowance once received.

Property and equipment, net

Property and equipment are stated at cost less accumulated depreciation and software amortization. Property and equipment primarily consists of software, buildings, certain leasehold improvements, and furniture. Software includes both purchased software and internally-developed software, including certain projects where development is in progress. Buildings primarily consists of owned facilities. Leasehold improvements are generally costs associated with lessee-owned interior office space improvements. Equipment primarily consists of communications and technology hardware. Depreciation of assets (other than land) is primarily calculated using the straight-line method over the estimated useful lives of the assets, within ranges outlined in the following table.

Asset type	Estimated useful life
Buildings, building components and land improvements	15 to 40 years
Furniture, fixtures and equipment	3 to 5 years
Software	2 to 10 years
Leasehold improvements (lessee-owned)	Lesser of useful life or lease term

Costs for significant internally-developed software projects are capitalized when the costs relate to development of new applications or modification of existing internal-use software that results in additional functionality. Additions, improvements and expenditures that extend the useful life of an asset are capitalized.

Identifiable intangible assets, net

Our identifiable intangible assets are amortized over their estimated useful lives on a straight-line basis and are evaluated for potential impairment whenever events or changes in circumstances suggest that the carrying value of an asset or asset group may not be fully recoverable.

Goodwill

Goodwill represents the cost of acquired businesses in excess of the fair value of the related net assets acquired. Indefinite-lived intangible assets such as goodwill are not amortized, but rather evaluated for impairment at least annually, or between annual impairment evaluation dates whenever events or circumstances indicate potential impairment exists. Impairment exists

RAYMOND JAMES & ASSOCIATES, INC.*Notes to Statement of Financial Condition (Unaudited)*

when the carrying value of a reporting unit exceeds its respective fair value.

In the course of our evaluation of the potential impairment to goodwill, we may elect either a qualitative or a quantitative assessment. Our qualitative assessments consider macroeconomic indicators including, but not limited to trends in equity and fixed income markets and other revenue-generating activities, gross domestic product, labor markets, and interest rates. We also consider regulatory changes, market capitalization of the Parent company, reporting unit specific results, and changes in key personnel and strategy. We assess these, and other, qualitative factors to determine whether the existence of events or circumstances indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If we determine it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then performing a quantitative impairment analysis is not required. However, if we conclude otherwise, we then perform a quantitative impairment analysis. If we elect not to perform a qualitative assessment, we perform a quantitative evaluation.

In our quantitative assessment, we estimate the fair value of the reporting unit with which the goodwill is associated and compare it to the carrying value. We estimate the fair value of our reporting units using an income approach based on a discounted cash flow model that includes significant assumptions about future operating results and cash flows, and, if appropriate, a market approach. If the carrying value of a reporting unit is greater than the estimated fair value, an impairment charge is recognized for the excess.

We have elected January 1 as our annual goodwill impairment evaluation date, evaluating balances as of December 31. See Note 9 for additional information regarding the outcome of our goodwill impairment assessments.

Leases

We have operating leases for the premises we occupy in many of our locations, including our employee-based branch office operations. At inception, we determine if an arrangement to utilize a building or piece of equipment is a lease and, if so, the appropriate lease classification. Substantially all of our leases are operating leases. If the arrangement is determined to be a lease, we recognize a right-of-use (“ROU”) lease asset and a corresponding lease liability on our Statement of Financial Condition. ROU lease assets represent our right to use an underlying asset for the lease term, and lease liabilities represent our obligation to make lease payments arising from the lease. We elected the practical expedient, where leases with an initial term of 12 months or less are not recorded as an ROU lease asset or lease liability. Our lease terms include any noncancelable periods and may reflect periods covered by options to extend or terminate when it is reasonably certain that we will exercise those options.

We record our ROU lease assets at the amount of the lease liability plus any prepaid rent, amounts paid for lessor-owned leasehold improvements, and initial direct costs, less any lease incentives and accrued rent. We record lease liabilities at commencement date based on the present value of lease payments over the lease term, which is discounted using our commencement date incremental borrowing rate, or at the imputed rate within the lease, as appropriate. Our incremental borrowing rate considers the weighted-average yields on RJF’s senior notes payable, adjusted for collateralization and tenor. For our real estate leases, we elected the practical expedient to account for the lease and non-lease components as a single lease.

See Note 10 for additional information on our leases.

Contingent liabilities

We recognize liabilities for contingencies when there is an exposure that, when fully analyzed, indicates it is both probable that a liability has been incurred and the amount of loss can be reasonably estimated. Whether a loss is probable, and if so, the estimated range of possible loss, is based upon currently available information and is subject to significant judgment, a variety of assumptions, and uncertainties. When a loss is probable and a range of possible loss can be estimated, we accrue the most likely amount within that range; if the most likely amount of possible loss within that range is not determinable, the minimum amount in the range of loss is accrued. No liability is recognized for those matters which, in management’s judgment, the determination of a reasonable estimate of loss is not possible, or for which a loss is not determined to be probable.

We record liabilities related to legal and regulatory proceedings in “Other payables” on our Statement of Financial Condition. The determination of these liability amounts requires significant judgment on the part of management. Management considers many factors including, but not limited to: the amount of the claim; the amount of the loss in the client’s account; the basis and validity of the claim; the possibility of wrongdoing on the part of one of our employees or financial advisors; previous results in similar cases; and legal precedents and case law. Each legal proceeding or significant regulatory matter is reviewed in each accounting period and the liability balance is adjusted as deemed appropriate by management. Any change in the liability amount is recorded in our Statement of Financial Condition. The actual costs of resolving legal matters or regulatory

RAYMOND JAMES & ASSOCIATES, INC.

Notes to Statement of Financial Condition (Unaudited)

proceedings may be substantially higher or lower than the recorded liability amounts for such matters. See Note 14 for additional information.

Share-based compensation

Certain employees participate in RJF's Stock Incentive Plan, which provides for the issuance of restricted stock unit ("RSU") awards. RJF estimates the market value of share-based awards on the date of grant and allocates the cost of providing these plans to us based on actual cost per employee. See Note 15 for further information on share-based compensation.

Deferred compensation plans

Certain employees participate in RJF's various deferred compensation plans that provide a return to the participant based upon the performance of various referenced investments. For certain of these plans, RJF invests directly, as a principal in such investments, related to their obligations to perform under the deferred compensation plans. For the Voluntary Deferred Compensation Plan ("VDCP"), Long-Term Incentive Plan ("LTIP"), and other certain plans, RJF purchases and holds life insurance on the lives of certain current and former participants to earn a competitive rate of return for participants and to provide a source of funds available to satisfy their obligation under the plan.

Income taxes

The results of our operations are included in the consolidated federal and certain consolidated state income tax returns of RJF. As a result of the inclusion in consolidated filings, the majority of income taxes payable and receivable reported on the Statement of Financial Condition are payable to and receivable from RJF. Federal and state income taxes are computed, under a tax sharing agreement with RJF, based on the separate return method.

The objective of accounting for income taxes is to recognize the amount of taxes payable or refundable for the current year. We utilize the asset and liability method to provide income taxes on all transactions recorded in our Statement of Financial Condition. This method requires that income taxes reflect the expected future tax consequences of temporary differences between the carrying amounts of assets or liabilities for book and tax purposes. Accordingly, a deferred tax asset or liability for each temporary difference is determined based on the tax rates that we expect to be in effect when the underlying items of income and expense are realized. Judgment is required in assessing the future tax consequences of events that have been recognized in our Statement of Financial Condition or tax returns. Variations in the actual outcome of these future tax consequences could materially impact our financial position or liquidity. See Note 13 for further information on our income taxes.

NOTE 3 – FAIR VALUE

Our “Financial instruments” and “Financial instrument liabilities” on our Statement of Financial Condition are recorded at fair value. For further information about such instruments and our significant accounting policies related to fair value, see Note 2. The following table presents assets and liabilities measured at fair value on a recurring basis. Netting adjustments represent the impact of counterparty and collateral netting on our derivative balances included on our Statement of Financial Condition. See Note 4 for additional information.

<i>\$ in millions</i>	Level 1	Level 2	Level 3	Netting adjustments	Balance as of March 31, 2022

(1) These assets consist of U.S. Treasuries with maturities greater than 3 months as of our date of purchase. These assets do not include U.S. Treasuries with maturities of less than 3 months as of our date of purchase with a fair value of \$650 million at March 31, 2022, which were considered cash equivalents. These assets are classified as Level 1.

(2) These assets are comprised of U.S. Treasuries primarily purchased to meet certain deposit requirements with clearing organizations.

As of March 31, 2022, 43% of our assets and less than 1% of our liabilities were measured at fair value on a recurring basis.

Financial instruments not recorded at fair value

Many, but not all, of the financial instruments we hold were recorded at fair value on the Statement of Financial Condition. The following financial instruments were not carried at fair value on our Statement of Financial Condition at March 31, 2022.

RAYMOND JAMES & ASSOCIATES, INC.*Notes to Statement of Financial Condition (Unaudited)*

Short-term financial instruments: The carrying value of short-term financial instruments, such as cash and cash equivalents, including amounts segregated for regulatory purposes, and the majority of collateralized agreements and collateralized financings, are recorded at amounts that approximate the fair value of these instruments. These financial instruments generally expose us to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market rates. Under the fair value hierarchy, cash and cash equivalents, including amounts segregated for regulatory purposes, are classified as Level 1 and collateralized agreements and financings are classified as Level 2.

Receivables and other assets: Brokerage client receivables, receivables from brokers, dealers and clearing organizations, other receivables, and certain other assets are recorded at amounts that approximate fair value and are classified primarily as Level 2 under the fair value hierarchy.

Loans to financial advisors, net: These financial instruments are primarily comprised of loans to financial advisors, primarily for recruiting and retention purposes. Loans to financial advisors, net are recorded at amounts that approximate fair value and are classified as Level 2 under the fair value hierarchy. Refer to Note 2 for information regarding loans to financial advisors, net.

Payables: Brokerage client payables, payables to brokers, dealers and clearing organizations, and other payables are recorded at amounts that approximate fair value and are classified as Level 2 under the fair value hierarchy.

NOTE 4 - DERIVATIVE ASSETS AND DERIVATIVE LIABILITIES

Our derivative assets and derivative liabilities are recorded at fair value and are included in “Derivative assets” and “Derivative liabilities” on our Statement of Financial Condition. The significant accounting policies governing our derivatives, including our methodologies for determining fair value, are described in Note 2.

Derivative balances included on our Statement of Financial Condition

The following table presents the gross fair values and notional amounts of derivatives by product type, the amounts of counterparty and cash collateral netting on our Statement of Financial Condition, as well as collateral posted and received under credit support agreements that do not meet the criteria for netting under GAAP.

<i>\$ in millions</i>	March 31, 2022		
	Derivative assets	Derivative liabilities	Notional amount
Derivatives not designated as hedging instruments			
Interest rate	\$ 61	\$ 56	\$ 6,778
Other	—	—	11
Total gross fair value/notional amount	61	56	\$ 6,789
Offset on the Statement of Financial Condition			
Counterparty netting	(21)	(21)	
Cash collateral netting	—	(4)	
Total amounts offset	(21)	(25)	
Net amounts presented on the Statement of Financial Condition	40	31	
Gross amounts not offset on the Statement of Financial Condition	—	—	
Total	\$ 40	\$ 31	

Risks associated with our derivatives and related risk mitigation***Credit risk***

We are exposed to credit losses primarily in the event of nonperformance by the counterparties to interest rate derivatives. Where we are subject to credit exposure, we perform a credit evaluation of counterparties prior to entering into derivative transactions and we continue to monitor their credit standings on an ongoing basis. We may require initial margin or collateral from counterparties in the form of cash or other marketable securities to support certain of these obligations as established by the credit threshold specified by the agreement and/or as a result of monitoring the credit standing of the counterparties.

Interest rate risk

We are exposed to interest rate risk related to certain of our interest rate derivatives. We monitor our risk exposure on our derivatives based on established counterparty limits.

NOTE 5 – COLLATERALIZED AGREEMENTS AND FINANCINGS

Collateralized agreements are comprised of reverse repurchase agreements and securities borrowed. Collateralized financings are comprised of repurchase agreements and securities loaned. We enter into these transactions in order to facilitate client activities, acquire securities to cover short positions and finance certain firm activities. The significant accounting policies governing our collateralized agreements and financings are described in Note 2.

Our reverse repurchase agreements, repurchase agreements, securities borrowing and securities lending transactions are governed by master agreements that are widely used by counterparties and that may allow for net settlements of payments in the normal course, as well as offsetting of all contracts with a given counterparty in the event of bankruptcy or default of one of the parties to the transaction. For financial statement purposes, we do not offset our reverse repurchase agreements, repurchase agreements, securities borrowed and securities loaned because the conditions for netting as specified by GAAP are not met. Although not offset on the Statement of Financial Condition, these transactions are included in the following table.

<i>\$ in millions</i>	Collateralized agreements			Collateralized financings		
	Reverse repurchase agreements	Securities borrowed	Total	Repurchase agreements	Securities loaned	Total
March 31, 2022						
Gross amounts of recognized assets/liabilities	\$ 217	\$ 346	\$ 563	\$ 140	\$ 285	\$ 425
Gross amounts offset on the Statement of Financial Condition	—	—	—	—	—	—
Net amounts presented on the Statement of Financial Condition	217	346	563	140	285	425
Gross amounts not offset on the Statement of Financial Condition	(217)	(333)	(550)	(140)	(260)	(400)
Net amounts	\$ —	\$ 13	\$ 13	\$ —	\$ 25	\$ 25

The total amount of collateral received under reverse repurchase agreements and the total amount of collateral posted under repurchase agreements exceeds the carrying value of these agreements on our Statement of Financial Condition.

Repurchase agreements and securities loaned accounted for as secured borrowings

The following table presents the remaining contractual maturity of repurchase agreements and securities lending transactions accounted for as secured borrowings.

<i>\$ in millions</i>	Overnight and continuous	Up to 30 days	30-90 days	Greater than 90 days	Total
March 31, 2022					
Repurchase agreements:					
Government and agency obligations	\$ 71	\$ —	\$ —	\$ —	\$ 71
Agency MBS and agency CMOs	69	—	—	—	69
Total repurchase agreements	140	—	—	—	140
Securities loaned:					
Equity securities	285	—	—	—	285
Total collateralized financings	\$ 425	\$ —	\$ —	\$ —	\$ 425

Collateral received and pledged

We receive cash and securities as collateral, primarily in connection with reverse repurchase agreements, securities borrowing agreements, derivative transactions and client margin loans. The collateral we receive reduces our credit exposure to individual counterparties.

In many cases, we are permitted to deliver or repledge financial instruments we have received as collateral to satisfy our collateral requirements under our repurchase agreements, securities lending agreements or other secured borrowings, to satisfy deposit requirements with clearing organizations, or to otherwise meet either our or our clients' settlement requirements.

The following table presents financial instruments at fair value that we received as collateral, were not included on our Statement of Financial Condition, and that were available to be delivered or repledged, along with the balances of such instruments that were delivered or repledged, to satisfy one of our purposes previously described.

<i>\$ in millions</i>	March 31, 2022	
Collateral we received that was available to be delivered or repledged	\$	3,398
Collateral that we delivered or repledged	\$	1,030

Encumbered assets

We pledge certain of our assets to collateralize either repurchase agreements or other secured borrowings, maintain lines of credit, or to satisfy our collateral or settlement requirements with counterparties or clearing organizations who may or may not have the right to deliver or repledge such instruments. The following table presents information about our assets that have been pledged for one of the purposes previously described.

<i>\$ in millions</i>	March 31, 2022	
Had the right to deliver or repledge	\$	232
Did not have the right to deliver or repledge	\$	64

NOTE 6 – RECEIVABLES FROM AND PAYABLES TO BROKERS, DEALERS AND CLEARING ORGANIZATIONS

<i>\$ in millions</i>	March 31, 2022	
	Receivables from brokers, dealers and clearing organizations, net	Payables to brokers, dealers and clearing organizations
Securities failed to deliver/receive	\$ 277	\$ 194
Open transactions, net	—	100
Dividends and interest	18	14
Deposits with clearing organizations	94	—
Total	\$ 389	\$ 308

Securities failed to deliver represent receivables for securities sold that we have not delivered, the settlement date has passed, and the cash owed to us has not been received. Securities failed to receive represent payables for securities purchased that we have not yet received, or paid for, and the settlement date has passed. Open transactions are amounts receivable and payable for securities that have not reached the contractual settlement dates and are recorded net on the Statement of Financial Condition.

Deposits with clearing organizations consist of cash and cash equivalents held by other clearing organizations or exchanges. Securities on deposit with clearing organizations are accounted for at fair value and are included in "Other investments" on our Statement of Financial Condition. See Note 3 for additional information on these securities.

NOTE 7 - LOANS TO FINANCIAL ADVISORS, NET

Loans to financial advisors are primarily comprised of loans originated as a part of our recruiting activities. See Note 2 for a discussion of our accounting policies related to loans to financial advisors and the related allowance for credit losses. The following table presents the balances for our loans to financial advisors and the related accrued interest receivable.

<i>\$ in millions</i>	March 31, 2022
Currently affiliated with the firm ⁽¹⁾	\$ 833
No longer affiliated with the firm ⁽²⁾	7
Total loans to financial advisors	840
Allowance for credit losses	(23)
Loans to financial advisors, net	\$ 817
Accrued interest receivable on loans to financial advisors	\$ 4
Allowance for credit losses as a percent of the loan portfolio	2.74 %

(1) These loans were predominantly current.

(2) These loans were predominantly past due for a period of 180 days or more.

The accrued interest receivable presented in the preceding table is reported in “Other receivables, net” on the Statement of Financial Condition.

NOTE 8 – PROPERTY AND EQUIPMENT, NET

The following table presents the components of our property and equipment, net.

<i>\$ in millions</i>	March 31, 2022		
	Gross carrying value	Accumulated depreciation/ software amortization	Property and equipment, net
Land	\$ 10	\$ —	\$ 10
Software, including development in progress	549	(357)	192
Buildings, building components, leasehold and land improvements	292	(194)	98
Furniture, fixtures and equipment	293	(246)	47
Total	\$ 1,144	\$ (797)	\$ 347

NOTE 9 - GOODWILL AND IDENTIFIABLE INTANGIBLE ASSETS, NET

Our goodwill and identifiable intangible assets result from various acquisitions. See Note 2 for a discussion of our goodwill and intangible assets accounting policies. The following table presents our goodwill and net identifiable intangible asset balances.

<i>\$ in millions</i>	March 31, 2022
Goodwill	\$ 312
Identifiable intangible assets, net	30
Total goodwill and identifiable intangible assets, net	\$ 342

Goodwill

There were no changes in the amount of goodwill during the six months ended March 31, 2022.

Qualitative assessments

As described in Note 2, we perform goodwill impairment testing on an annual basis or when an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We performed our latest annual goodwill impairment testing as of our January 1, 2022 evaluation date, evaluating balances as of December 31, 2021. In that testing, we performed a qualitative impairment assessment for each of our reporting units that had goodwill. Based upon the outcome of our qualitative assessments, no impairment was identified.

Our qualitative assessments consider macroeconomic indicators, such as trends in equity and fixed income markets, gross domestic product, labor markets, interest rates, and housing markets. We also consider regulatory changes, reporting unit specific results, and changes in key personnel and strategy. Changes in these indicators, and our ability to respond to such changes, may trigger the need for impairment testing at a point other than our annual assessment date.

Subsequent to this annual impairment testing, and as a result of the recent market uncertainty due to the potential indirect effects of the Russian invasion of Ukraine (“the Ukraine conflict”), we performed an evaluation to determine whether the impacts resulting from the Ukraine conflict were indicators triggering additional impairment tests as of March 31, 2022. As a result of our assessments, we concluded that the fair value of our reporting units had not more likely than not been reduced below their respective carrying values and that the negative impact of the Ukraine conflict on our fiscal second quarter of 2022 was not a triggering event to perform a quantitative test.

Identifiable intangible assets, net

The following table sets forth our identifiable intangible asset balances, net of accumulated amortization.

<i>\$ in millions</i>	Six months ended March 31, 2022
Net identifiable intangible assets as of beginning of year	\$ 33
Amortization expense	(3)
Net identifiable intangible assets as of March 31, 2022	<u>\$ 30</u>

The following table summarizes our identifiable intangible assets by type.

<i>\$ in millions</i>	March 31, 2022	
	Gross carrying value	Accumulated amortization
Customer relationships	\$ 75	\$ (46)
Seller relationship agreements	4	(3)
Total	<u>\$ 79</u>	<u>\$ (49)</u>

NOTE 10 - LEASES

The following table presents the balances related to our leases on our Statement of Financial Condition. See Note 2 for additional information related to our leases, including a discussion of our accounting policies.

<i>\$ in millions</i>	March 31, 2022
ROU lease assets	\$ 385
Lease liabilities	\$ 389

The weighted-average remaining lease term and discount rate for our leases is presented in the following table.

	March 31, 2022
Weighted-average remaining lease term	6.6 years
Weighted-average discount rate	3.25 %

Lease liabilities

The maturities by fiscal year of our lease liabilities as of March 31, 2022 are presented in the following table.

	<i>\$ in millions</i>
Remainder of 2022	\$ 47
2023	90
2024	69
2025	54
2026	44
Thereafter	128
Gross lease payments	432
Less: interest	(43)
Present value of lease liabilities	\$ 389

Lease liabilities in the preceding table excluded \$49 million of minimum lease payments related to lease arrangements that were signed but not yet commenced. These leases are estimated to commence between dates later in fiscal year 2022 and fiscal year 2025 with lease terms ranging from one to 11 years.

NOTE 11 – RELATED PARTY TRANSACTIONS

Pursuant to formal clearing agreements, we clear trades for affiliated entities, including RJFS. We confirm securities trades, process securities movements, record transactions with clients in their accounts and collect securities commissions on behalf of such affiliates.

Receivables from affiliates of \$18 million are included in “Other receivables, net” on our Statement of Financial Condition at March 31, 2022. At March 31, 2022, RJ&A had purchased \$40 million of receivables related to trailing commissions from mutual funds and annuity products from RJFS.

Of the total \$1.68 billion “Loans and payables to affiliates, net” on our Statement of Financial Condition at March 31, 2022, \$1.67 billion related to an intercompany loan and interest payable to our Parent, which we have invested in cash and cash equivalents on its behalf or otherwise deployed in our normal business activities. The remaining balance includes amounts payable for related party transactions conducted in the normal course of business.

The related party transactions that give rise to these receivables and payables are settled monthly with cash transfers with the exception of intercompany loans.

NOTE 12 – OTHER BORROWINGS

Secured and unsecured financing arrangements

In February 2019, RJF and RJ&A entered into an unsecured revolving credit facility agreement (the “Credit Facility”) with a syndicate of lenders, which was amended in April 2021 and matures in April 2026. This committed unsecured borrowing facility provides for maximum borrowings of up to \$500 million, with a sublimit of \$300 million for RJF. RJ&A may borrow up to \$500 million under the Credit Facility, depending on the amount of outstanding borrowings of RJF. The interest rates on borrowings under the Credit Facility are variable and based on the London Interbank Offered Rate (“LIBOR”), as adjusted for RJF’s credit rating; however, the administrative agent has the right to select a commercially available alternative reference rate to LIBOR if adequate and reasonable means do not exist for ascertaining LIBOR. There were no borrowings outstanding on the Credit Facility as of March 31, 2022. There is a facility fee associated with the Credit Facility, which also varies with RJF’s credit rating. Based upon RJF’s credit rating as of March 31, 2022, the variable rate facility fee, which is applied to the committed amount, was 0.15% per annum.

In addition to the Credit Facility, we maintain various secured and unsecured lines of credit, which are generally utilized to finance certain fixed income securities or for cash management purposes. Borrowings during the year were generally day-to-day and there were no borrowings outstanding on these arrangements as of March 31, 2022. The interest rates for these

RAYMOND JAMES & ASSOCIATES, INC.*Notes to Statement of Financial Condition (Unaudited)*

arrangements are variable and are based on a daily bank quoted rate, which may reference LIBOR, the Fed Funds rate, a lender's prime rate, or another commercially available rate, as applicable.

We also have other collateralized financings included in "Collateralized financings" on our Statement of Financial Condition. See Note 5 for information regarding our other collateralized financing arrangements.

Mortgage notes payable

Mortgage notes payable pertain to mortgage loans on certain of our corporate headquarters offices located in St. Petersburg, Florida. These mortgage loans are secured by land, buildings, and improvements. These mortgage loans bear a fixed interest rate of 5.7% with repayment terms of monthly interest and principal debt service and have a January 2023 maturity. As of March 31, 2022, the outstanding balance on the mortgage notes payable was \$5 million.

NOTE 13 – INCOME TAXES

For a discussion of our income tax accounting policies and other income tax-related information see Note 2.

Income taxes

The cumulative effects of temporary differences that give rise to significant portions of the deferred tax asset/(liability) items are detailed in the following table.

<i>\$ in millions</i>	March 31, 2022
Deferred tax assets:	
Accrued expenses	\$ 23
Deferred compensation	124
Lease liabilities	98
Other	4
Total deferred tax assets	249
Deferred tax liabilities:	
Goodwill and identifiable intangible assets	(40)
Property and equipment	(72)
Lease ROU assets	(97)
Total deferred tax liabilities	(209)
Net deferred tax assets	\$ 40

Management believes it is more likely than not that the deferred tax asset will be fully realized based on expectations of future taxable income, the company's ability to net losses against consolidated taxable income of the affiliated group in accordance with the tax sharing agreement and the ability to carryback losses against prior year taxable income. As a result, our deferred tax asset required no valuation allowance at March 31, 2022.

As of March 31, 2022, accrued interest and penalties included in the unrecognized tax benefits liability was approximately \$2 million.

The following table presents the aggregate changes in the balances for uncertain tax positions.

<i>\$ in millions</i>	Six months ended March 31, 2022
Uncertain tax positions beginning of year	\$ 10
Increases for tax positions related to the current year	2
Uncertain tax positions as of March 31, 2022	\$ 12

RAYMOND JAMES & ASSOCIATES, INC.

Notes to Statement of Financial Condition (Unaudited)

The total amount of uncertain tax positions that, if recognized, would impact the effective tax rate (the items included in the preceding table after considering the federal tax benefit associated with any state tax provisions) was \$10 million at March 31, 2022. We anticipate that the uncertain tax position balance will decrease by approximately \$2 million over the next 12 months as a result of the expiration of statutes of limitations and the completion of tax authorities' examinations.

The results of our operations were included in the consolidated income tax returns of RJF in the U.S. federal jurisdiction and certain consolidated states. We also file separate income tax returns in certain states and local jurisdictions. With few exceptions, we are generally no longer subject to U.S. federal, state and local, or foreign income tax examination by tax authorities for years prior to fiscal year 2018 for federal tax returns and fiscal year 2017 for state and local tax returns. There are various state audits in process that include the results of our operations within a combined/consolidated state filing. We continue to monitor the activity of these audits to assess any tax implications on our separate company financials.

NOTE 14 – COMMITMENTS, CONTINGENCIES AND GUARANTEES

Commitments and contingencies

Underwriting commitments

In the normal course of business, we enter into commitments for debt and equity underwritings. As of March 31, 2022, we had one such open underwriting commitment, which was subsequently settled in an open market transaction and did not result in a significant loss.

Lending commitments and other credit-related financial instruments

We enter into margin lending arrangements which allow customers to borrow against the value of qualifying securities. Margin loans are collateralized by the securities held in the customer's account at RJ&A. Collateral levels and established credit terms are monitored daily and we require customers to deposit additional collateral or reduce balances as necessary.

We offer loans to prospective financial advisors for recruiting and retention purposes (see Notes 2 and 7 for further discussion of our loans to financial advisors). These offers are contingent upon certain events occurring, including the individuals joining us and meeting certain other conditions outlined in their offer.

Other commitments

For information regarding our lease commitments, including the maturities of our lease liabilities, see Note 10.

Guarantees

We are required by federal law to be a member of the Securities Investors Protection Corporation ("SIPC"). The SIPC fund provides protection up to \$500 thousand per client for securities and cash held in client accounts, including a limitation of \$250 thousand on claims for cash balances. Account protection applies when a SIPC member fails financially and is unable to meet its obligations to clients. This coverage does not protect against market fluctuations.

Legal and regulatory matter contingencies

In the normal course of our business, we have been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with our activities as a financial services institution.

We are subject to regular reviews and inspections by regulatory authorities and self-regulatory organizations. Reviews can result in the imposition of sanctions for regulatory violations, ranging from non-monetary censures to fines and, in serious cases, temporary or permanent suspension from conducting business, or limitations on certain business activities. In addition, regulatory agencies and self-regulatory organizations institute investigations from time to time, among other things, into industry practices, which can also result in the imposition of such sanctions.

We may contest liability and/or the amount of damages, as appropriate, in each pending matter. The level of litigation and investigatory activity (both formal and informal) by government and self-regulatory agencies in the financial services industry continues to be significant. There can be no assurance that material losses will not be incurred from claims that have not yet been asserted or are not yet determined to be material.

For many legal and regulatory matters, we are unable to estimate a range of reasonably possible loss as we cannot predict if, how or when such proceedings or investigations will be resolved or what the eventual settlement, fine, penalty or other relief, if any, may be. A large number of factors may contribute to this inherent unpredictability: the proceeding is in its early stages; the damages sought are unspecified, unsupported or uncertain; it is unclear whether a case brought as a class action will be allowed to proceed on that basis; the other party is seeking relief other than or in addition to compensatory damages (including, in the case of regulatory and governmental proceedings, potential fines and penalties); the matters present significant legal uncertainties; we have not engaged in settlement discussions; discovery is not complete; there are significant facts in dispute; and numerous parties are named as defendants (including where it is uncertain how liability might be shared among defendants). Subject to the foregoing, after consultation with counsel, we believe that the outcome of such litigation and regulatory proceedings will not have a material adverse effect on our financial condition.

There are certain matters for which we are unable to estimate the upper end of the range of reasonably possible loss. With respect to legal and regulatory matters for which management has been able to estimate a range of reasonably possible loss as of March 31, 2022, we estimated the upper end of the range of reasonably possible aggregate loss to be approximately \$65 million in excess of the aggregate accruals for such matters. Refer to Note 2 for a discussion of our criteria for recognizing liabilities for contingencies.

NOTE 15 – SHARE-BASED AND OTHER COMPENSATION PLANS

We participate, along with other affiliated companies, in various qualified and non-qualified savings and stock incentive plans of RJF. RJF allocates the cost of providing these plans to RJ&A based on actual cost per employee.

The profit sharing plan and employee stock ownership plan are qualified plans that provide certain death, disability or retirement benefits for all employees who meet certain service requirements. The plans are noncontributory and contributions by RJF, if any, are determined annually by RJF's Board of Directors, or a committee thereof, on a discretionary basis. Benefits become fully vested after five years of qualified service, age 65, or if a participant separates from service due to death or disability.

RJ&A participates in RJF's 401(k) plan, which is a qualified plan that may provide for a discretionary contribution or a matching contribution each year. Matching contributions are 75% of the first \$1,000 and 25% of the next \$1,000 of eligible compensation deferred by each participant annually.

The LTIP is a non-qualified deferred compensation plan that provides benefits to certain employees who meet certain compensation or production requirements.

Contributions to the qualified plans and the LTIP are approved annually by RJF's Board of Directors or a committee thereof.

RJF's VDCP is a non-qualified deferred compensation plan for certain employees, in which eligible participants may elect to defer a percentage or specific dollar amount of their compensation.

Share-based compensation plans

Under RJF's Stock Incentive Plan, certain RJ&A employees may be granted RSU awards.

Employee stock purchase plan

The employee stock purchase plan allows employees to purchase RJF's common stock at a 15% discount annually. Share purchases in any calendar year are limited to the lesser of 1,000 shares or shares with a fair market value of \$25,000. The purchase price of the stock is 85% of the average high and low market price on the day prior to the purchase date.

NOTE 16 – NET CAPITAL REQUIREMENTS

As a registered broker-dealer, we are subject to the requirements of the Uniform Net Capital Rule (Rule 15c3-1) under the Securities Exchange Act of 1934. As a member firm of FINRA, we are subject to FINRA's capital requirements, which are substantially the same as Rule 15c3-1. Rule 15c3-1 provides for an "alternative net capital requirement," which we have elected. Regulations require that minimum net capital, as defined, be equal to the greater of \$1.5 million or 2% of aggregate

RAYMOND JAMES & ASSOCIATES, INC.*Notes to Statement of Financial Condition (Unaudited)*

debit items arising from client balances. FINRA may impose certain restrictions, such as restricting withdrawals of equity capital, if a member firm were to fall below a certain threshold or fail to meet minimum net capital requirements. The following table presents our net capital position.

<i>\$ in millions</i>	March 31, 2022
(Alternative Method elected)	
Net capital as a percent of aggregate debit items	42.9 %
Net capital	\$ 1,271
Less: required net capital	(59)
Excess net capital	\$ 1,212

NOTE 17 – SUBSEQUENT EVENTS

Management considered subsequent events through May 24, 2022. There were no subsequent events that required recognition or disclosure.

LIFE WELL PLANNED.
