

PORTFOLIO 2 CORE FIXED INCOME WITH GROWTH

2ND QUARTER 2014

A portfolio designed for a more conservative investor seeking income as a primary objective with a small percentage allocated to growth.

STRATEGY OVERVIEW

Core Fixed Income With Growth strategy is a global asset allocation portfolio designed for a more conservative investor and one seeking income as a primary objective. The portfolio is invested primarily in global fixed income and high-dividend-paying equities. With a target allocation of 80% fixed income and 20% equity, the portfolio seeks to provide a high degree of income with a minor focus on growth.

INVESTMENT PHILOSOPHY

Our team's investment philosophy is built around a top-down process. We focus on the global macroeconomic environment to drive the allocation of our portfolios, seeking the most attractive asset allocation mix for any given point in time. We believe that our blend of fundamental and technical analysis coupled with our top-down approach gives us the best opportunity to positively impact long-term performance and risk management for our clients.

INVESTMENT PROCESS

We utilize fundamental and technical research from Raymond James and several outside resources. Portfolios are monitored on an ongoing basis and allocation changes are made to manage risk and increase potential for long-term returns.

SEVEN PORTFOLIO MODELS TO ADDRESS MULTIPLE INVESTOR OBJECTIVES

At Meeks Financial Group, we know that no two investors are exactly alike in their goals and risk tolerance. This is why Rick Meeks has developed and offers seven different risk-based strategies – to meet a wide range of client objectives. He can also customize each of these portfolios to allow for specific needs such as liquidity and tax management.

There is no assurance that any investment strategy will be successful. Asset allocation and diversification does not ensure a profit or protect against a loss. The charts and tables presented herein are for illustrative purposes only and should not be considered as the sole basis for your investment decision. There is an inverse relationship between interest rate movements and fixed income prices. Dividends are not guaranteed and must be authorized by the company's board of directors. It is important to review the investment objectives, risk tolerance, tax objectives and liquidity needs before choosing an investment style or manager.
