

JPMorgan Chase Bank, National Association

Structured Investments

\$984,000

Certificates of Deposit Linked to the J.P. Morgan ETF Efficiente[®] DS 5 Index due October 26, 2023

- The certificates of deposit (“CDs”) are designed for investors who seek exposure to any appreciation of the J.P. Morgan ETF Efficiente[®] DS 5 Index over the terms of the CDs.
- Investors should be willing to forgo interest and dividend payments, while seeking full repayment of principal at maturity.
- The CDs are issued by JPMorgan Chase Bank, National Association (“JPMorgan Chase Bank”). The CDs are insured only within the limits and to the extent described in this disclosure supplement and in the accompanying disclosure statement. See “Selected Risk Considerations — Limitations on FDIC Insurance” in this disclosure supplement. **Any payment on the CDs in excess of FDIC insurance limits is subject to the credit risk of JPMorgan Chase Bank.**
- Investing in the CDs is not equivalent to investing in a conventional CD or directly in the J.P. Morgan ETF Efficiente[®] DS 5 Index or any of its Basket Constituents.
- Minimum denominations of \$10,000 and integral multiples of \$1,000 in excess thereof
- The CDs priced on October 21, 2016 and are expected to settle on or about October 28, 2016.
- CUSIP: 48126XGV1

Investing in the CDs involves a number of risks. See “Risk Factors” beginning on page 7 of the accompanying disclosure statement, “Risk Factors” beginning on page US-5 of the accompanying underlying supplement no. CD-6-I and “Selected Risk Considerations” beginning on page DS-5 of this disclosure supplement.

Fees and Discounts: J.P. Morgan Securities LLC, which we refer to as JPMS, and its affiliates will pay all of the selling commissions of \$35.00 per \$1,000 CD it receives from us to other affiliated or unaffiliated dealers. See “Supplemental Use of Proceeds” in this disclosure supplement.

The estimated value of the CDs as determined by JPMS, when the terms of the CDs were set, was \$931.80 per \$1,000 CD. See “JPMS’s Estimated Value of the CDs” in this disclosure supplement for additional information.

Our affiliate, JPMS, certain of its affiliates and other broker-dealers may use this disclosure supplement and the accompanying disclosure statement in connection with offers and sales of the CDs after the date hereof.

Key Terms

Index: The J.P. Morgan ETF Efficiente[®] DS 5 Index (Bloomberg ticker: EEJPDS5E). The level of the Index reflects the deduction of a fee of 1.00% per annum that accrues daily.

Participation Rate: 165.00%

Initial Value: The closing level of the Index on the Pricing Date, which was 224.04

Final Value: The closing level of the Index on the Observation Date

Pricing Date: October 21, 2016

Original Issue Date (Settlement Date): On or about October 28, 2016

Observation Date*: October 23, 2023

Maturity Date*: October 26, 2023

* Subject to postponement in the event of a market disruption event and as described under “Supplemental Terms of the CDs — Postponement of a Determination Date — CDs linked solely to the ETF Efficiente Index” in the accompanying underlying supplement and “General Terms of the CDs — Postponement of a Determination Date — CDs Linked to a Single Underlying — CDs Linked to a Single Underlying (Other Than a Commodity Index)” and “General Terms of the CDs — Postponement of a Payment Date” in the accompanying disclosure statement

Payment at Maturity: At maturity, you will receive a cash payment, for each \$1,000 CD, of \$1,000 plus the Additional Amount, which may be zero.

You will receive no other interest or dividend payments during the term of the CDs. The repayment of your full principal amount applies only at maturity, subject to the credit risk of JPMorgan Chase Bank and applicable FDIC limits.

Additional Amount[†]: The Additional Amount payable at maturity per \$1,000 CD will equal:

$\$1,000 \times \text{the Index Return} \times \text{the Participation Rate}$,
provided that the Additional Amount will not be less than zero.

[†] Subject to the impact of a commodity hedging disruption event as described under “General Terms of the CDs — Consequences of a Commodity Hedging Disruption Event — Adjustment of the Payment at Maturity” in the accompanying disclosure statement. In the event of a commodity hedging disruption event, we have the right, but not the obligation, to cause the CD calculation agent to determine on the commodity hedging disruption date the value of the Additional Amount payable at maturity. Under these circumstances, the value of the Additional Amount payable at maturity will be determined prior to, and without regard to the closing level of the Index on, the Observation Date.

Index Return:

$$\frac{(\text{Final Value} - \text{Initial Value})}{\text{Initial Value}}$$

Early Withdrawals: At par upon death or adjudication of incompetence of a beneficial holder of the CDs. For information about early withdrawals and the limitations on such early withdrawals, see “General Terms of the CDs — Additions and Withdrawals” in the accompanying disclosure statement.

The J.P. Morgan ETF Efficiente® DS 5 Index

The J.P. Morgan ETF Efficiente® DS 5 Index (the “Index”) was developed and is maintained and calculated by J.P. Morgan Securities plc (“JPMS plc”), one of our affiliates. JPMS plc acts as the calculation agent for the Index (the “index calculation agent”). The Index is a notional dynamic basket that tracks the excess return of a portfolio of twelve exchange-traded funds (“ETFs”) (each an “ETF Constituent,” and collectively the “ETF Constituents”), with dividends notionally reinvested, and the JPMorgan Cash Index USD 3 Month (including any successor or substitute cash index included in the Index, the “Cash Constituent”) over the return of the Cash Constituent, less a fee of 1.00% per annum that accrues daily, while targeting a specific volatility on a daily basis. We refer to the ETF Constituents and the Cash Constituent together as the “Basket Constituents.” The ETF Constituents represent a diverse range of asset classes and geographic regions.

The Index rebalances monthly a synthetic portfolio composed of the Basket Constituents. The Index is based on the “modern portfolio theory” approach to asset allocation, which suggests how a rational investor should allocate his capital across the available universe of assets to maximize return for a given risk appetite. The Index uses the concept of an “efficient frontier” to define the asset allocation of the Index. An efficient frontier for a portfolio of assets defines the optimum return of the portfolio for a given amount of risk. The Index uses the volatility of returns of hypothetical portfolios as the measure of risk. This strategy is based on the assumption that the most efficient allocation of assets is one that maximizes returns per unit of risk.

The strategy assigns the weights to the Basket Constituents after determining the returns and volatilities of multiple hypothetical portfolios comprising the Basket Constituents measured over the previous six months. The re-weighting methodology seeks to identify the weight for each Basket Constituent that would have resulted in the hypothetical portfolio with the highest return over the relevant measurement period, subject to an annualized volatility over the same period of 5% or less. Thus, the portfolio exhibiting the highest return with an annualized volatility of 5% or less is then selected, with the weightings for that portfolio applied to the Basket Constituents. In the event that none of the portfolios has an annualized volatility equal to or less than 5%, this volatility threshold is increased by 1% until a portfolio is selected.

In addition, the Index targets an annualized volatility of 5% on a daily basis by dynamically adjusting its exposure to the synthetic portfolio of Basket Constituents. The exposure of the Index to the synthetic portfolio is equal to the target volatility of 5% divided by the annualized volatility of the same portfolio over the prior month, subject to certain constraints described below, including a minimum exposure of 0% and a maximum exposure of 150%. Accordingly, as the volatility of the portfolio increases, the exposure to the portfolio decreases, and as the volatility of the portfolio decreases, the exposure to the portfolio increases. Accordingly, if the volatility of the synthetic portfolio is less than the target volatility of 5%, the Index employs leverage, subject to the maximum exposure of 150%.

The aggregate weight of the Cash Constituent at any given time represents the portion of the synthetic portfolio of Basket Constituents that is uninvested at that time. In addition, when the exposure of the Index to the synthetic portfolio of Basket Constituents is less than 100% on any day, a portion of the synthetic portfolio will be uninvested. The Index will reflect no return for any uninvested portion.

The following are the Basket Constituents composing the Index and the maximum weighting constraints assigned to the relevant sector and asset type to which each belongs:

	Sector Cap	Basket Constituent	Asset Cap
1	Developed Equities (50%)	SPDR® S&P 500® ETF Trust	20%
2		iShares® Russell 2000 ETF	10%
3		iShares® MSCI EAFE ETF	20%
4	Bonds (50%)	iShares® 20+ Year Treasury Bond ETF	20%
5		iShares® iBoxx \$ Investment Grade Corporate Bond ETF	20%
6		iShares® iBoxx \$ High Yield Corporate Bond ETF	20%
7	Emerging Markets (25%)	iShares® MSCI Emerging Markets ETF	20%
8		iShares® J.P. Morgan USD Emerging Markets Bond ETF	20%
9	Alternative Investments (25%)	iShares® U.S. Real Estate ETF	20%
10		iShares® S&P GSCI™ Commodity-Indexed Trust	10%
11		SPDR® Gold Trust	10%
12	Inflation Protected Bonds and Cash (50%)	iShares® TIPS Bond ETF	50%
13		JPMorgan Cash Index USD 3 Month	50%

The Index is reported by the Bloomberg Professional® service (“Bloomberg”) under the ticker symbol “EEJPDS5E.”

On July 1, 2013, the names of the iShares® ETF Constituents (other than the iShares® S&P GSCI™ Commodity-Indexed Trust) were changed to the names listed in the table above.

Notwithstanding anything to the contrary in the accompanying underlying supplement, the J.P. Morgan Emerging Markets Bond Index Global CORE, which is the index underlying the iShares® J.P. Morgan USD Emerging Markets Bond ETF, is a proprietary index that was developed and is maintained and calculated by the Global Index Research Group ("GIRG") of JPMorgan Chase & Co., our parent company. The prices of the bonds included in the J.P. Morgan Emerging Markets Bond Index Global CORE are provided by PricingDirect Inc. ("PricingDirect"), a wholly owned subsidiary of JPMorgan Chase & Co. See "Selected Risk Considerations — Risks Relating to the CDs Generally — Potential Conflicts." GIRG and PricingDirect are separated by information barriers from each other, and from the JPMorgan Chase & Co.'s sales and trading teams. GIRG and PricingDirect will make all determinations and calculations in good faith and in a commercially reasonable manner.

"Efficiente" is a registered trademark of JPMorgan Chase & Co.

See "The J.P. Morgan ETF Efficiente® DS 5 Index" in the accompanying underlying supplement for more information about the Index and the Basket Constituents.

Hypothetical Payout Profile

The following table and graph illustrate the hypothetical payment at maturity on the CDs linked to a hypothetical Index. The hypothetical payments set forth below assume the following:

- an Initial Value of 100 and
- a Participation Rate of 165.00%.

The hypothetical Initial Value of 100 has been chosen for illustrative purposes only and does not represent the actual Initial Value. The actual Initial Value is the closing level of the Index on the Pricing Date and is specified in “Key Terms – Initial Value” in this disclosure supplement. For historical data regarding the actual closing level of the Index, please see the historical information set forth under “Hypothetical Back-Tested Data and Historical Information” in this disclosure supplement.

Each hypothetical payment at maturity set forth below is for illustrative purposes only and may not be the actual payment at maturity applicable to a purchaser of the CDs. The numbers appearing in the following table and graph have been rounded for ease of analysis.

Final Value	Index Return	Additional Amount	Payment at Maturity	Annual Percentage Yield
180.00	80.00%	\$1,320.00	\$2,320.00	12.79%
170.00	70.00%	\$1,155.00	\$2,155.00	11.61%
160.00	60.00%	\$990.00	\$1,990.00	10.35%
150.00	50.00%	\$825.00	\$1,825.00	8.99%
140.00	40.00%	\$660.00	\$1,660.00	7.52%
130.00	30.00%	\$495.00	\$1,495.00	5.92%
120.00	20.00%	\$330.00	\$1,330.00	4.16%
115.00	15.00%	\$247.50	\$1,247.50	3.21%
110.00	10.00%	\$165.00	\$1,165.00	2.21%
105.00	5.00%	\$82.50	\$1,082.50	1.14%
100.00	0.00%	\$0.00	\$1,000.00	0.00%
95.00	-5.00%	N/A	\$1,000.00	0.00%
90.00	-10.00%	N/A	\$1,000.00	0.00%
85.00	-15.00%	N/A	\$1,000.00	0.00%
80.00	-20.00%	N/A	\$1,000.00	0.00%
70.00	-30.00%	N/A	\$1,000.00	0.00%
60.00	-40.00%	N/A	\$1,000.00	0.00%
50.00	-50.00%	N/A	\$1,000.00	0.00%
40.00	-60.00%	N/A	\$1,000.00	0.00%
30.00	-70.00%	N/A	\$1,000.00	0.00%
20.00	-80.00%	N/A	\$1,000.00	0.00%
10.00	-90.00%	N/A	\$1,000.00	0.00%
0.00	-100.00%	N/A	\$1,000.00	0.00%

The following graph demonstrates the hypothetical total returns and hypothetical payments at maturity on the CDs at maturity for a subset of Index Returns detailed in the table above (-30% to 40%). We cannot give you assurance that the performance of the Index will result in a payment at maturity in excess of \$1,000 per \$1,000 CD.

How the CDs Work

Upside Scenario:

If the Final Value is greater than the Initial Value, investors will receive at maturity the \$1,000 principal amount plus the Additional Amount, which is equal to \$1,000 times the Index Return times the Participation Rate of 165.00%, for each \$1,000 CD.

- If the closing level of the Index increases 5.00%, investors will receive at maturity an 8.25% return, or \$1,082.50 per \$1,000 CD.

Par Scenario:

If the Final Value is equal to the Initial Value or is less than the Initial Value, the Additional Amount will be zero and investors will receive at maturity the principal amount of their CDs.

The hypothetical returns and hypothetical payments on the CDs shown above apply **only if you hold the CDs for their entire term**. These hypotheticals do not reflect the fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns and hypothetical payments shown above would likely be lower.

Selected Risk Considerations

An investment in the CDs involves significant risks. These risks are explained in more detail in the “Risk Factors” sections of the accompanying disclosure statement and underlying supplement.

Risks Relating to the CDs Generally

- **THE CDs MAY NOT PAY MORE THAN THE PRINCIPAL AMOUNT AT MATURITY —**

If the Final Value is less than or equal to the Initial Value, you will receive only the principal amount of your CDs at maturity, and you will not be compensated for any loss in value due to inflation and other factors relating to the value of money over time.

- **THE LEVEL OF THE INDEX WILL INCLUDE THE DEDUCTION OF A FEE OF 1.00% PER ANNUM —**

This fee will be deducted daily. As a result of the deduction of this fee, the level of the Index will trail the value of a hypothetical identically constituted synthetic portfolio from which no such fee is deducted.

- **CREDIT RISK OF JPMORGAN CHASE BANK —**

A depositor purchasing a principal amount of CDs in excess of FDIC insurance limits, when aggregated with all other deposits held by the depositor in the same right and capacity at JPMorgan Chase Bank, will be subject to the credit risk of JPMorgan Chase Bank. Investors are dependent on JPMorgan Chase Bank’s ability to pay any amounts due on the CDs in excess of FDIC insurance limits. Any actual or potential change in the creditworthiness, credit ratings or credit spreads related to us or our affiliates, as determined by the market for taking that credit risk, is likely to adversely affect the value of the CDs.

- **WE MAY DETERMINE THE ADDITIONAL AMOUNT FOR YOUR CDs EARLY IF A COMMODITY HEDGING DISRUPTION EVENT OCCURS —**

If we or our affiliates are unable to effect transactions necessary to hedge our obligations under the CDs due to a commodity hedging disruption event, we may, in our sole and absolute discretion, cause the CD calculation agent to determine the Additional Amount for your CDs early based on the CD calculation agent's good faith determination of the option value for your CDs (*i.e.*, the price of the embedded option representing the Additional Amount payable on the CDs at maturity) on the date on which the CD calculation agent determines that a commodity hedging disruption event has occurred, which may be significantly earlier than the Observation Date. Under these circumstances, the amount due and payable on your CDs will be due and payable only at maturity, and that amount will not reflect any appreciation of the Index after such early determination. See "General Terms of the CDs — Consequences of a Commodity Hedging Disruption Event" in the accompanying disclosure statement for more information.

- **POTENTIAL CONFLICTS —**

We and our affiliates play a variety of roles in connection with the CDs. In performing these duties, our economic interests are potentially adverse to your interests as an investor in the CDs. It is possible that hedging or trading activities of ours or our affiliates in connection with the CDs could result in substantial returns for us or our affiliates while the value of the CDs declines. Please refer to "Risk Factors — Risks Relating to Conflicts of Interest" in the accompanying disclosure statement.

In addition, one of our affiliates, JPMS, is the sponsor of one of the Basket Constituents (the Cash Constituent). The Global Index Research Group ("GIRG") of JPMorgan Chase & Co., our parent company, developed and maintains and calculates the J.P. Morgan Emerging Markets Bond Index Global CORE, which is the index underlying the iShares® J.P. Morgan USD Emerging Markets Bond ETF, one of the Basket Constituents. The J.P. Morgan Emerging Markets Bond Index Global CORE makes use of certain weights, prices, values, levels or dates that are determined by PricingDirect Inc. ("PricingDirect"). GIRG is part of JPMorgan Chase & Co.'s Global Research division and resides within JPMS. PricingDirect is JPMorgan Chase & Co.'s wholly owned subsidiary and provides valuation and other metrics data for fixed-income securities and derivatives. PricingDirect determines these prices through a proprietary evaluation process that takes into account market-based evaluations (such as market intelligence for traded, quoted securities). In addition, under some circumstances, the pricing information provided by PricingDirect on the bonds underlying the J.P. Morgan Emerging Markets Bond Index Global CORE may be derived solely from price quotations or internal valuations made by one or more of our affiliates. Accordingly, conflicts of interest exist between GIRG and PricingDirect, on the one hand, and you, on the other hand. None of JPMS, GIRG or PricingDirect will have any obligation to consider your interests as a holder of the CDs in taking any actions that might affect the value of your CDs.

- **THE CDs DO NOT PAY INTEREST.**

- **YOU WILL NOT RECEIVE DIVIDENDS OR OTHER DISTRIBUTIONS ON THE SECURITIES UNDERLYING THE BASKET CONSTITUENTS OR HAVE ANY RIGHTS WITH RESPECT TO THOSE SECURITIES.**

- **JPMS AND ITS AFFILIATES MAY HAVE PUBLISHED RESEARCH, EXPRESSED OPINIONS OR PROVIDED RECOMMENDATIONS THAT ARE INCONSISTENT WITH INVESTING IN OR HOLDING THE CDs, AND MAY DO SO IN THE FUTURE —**

Any research, opinions or recommendations could affect the market value of the CDs. Investors should undertake their own independent investigation of the merits of investing in the CDs, the Basket Constituents and the securities, commodities, commodity futures contracts and other assets underlying the Basket Constituents included in the Index.

- **LACK OF LIQUIDITY —**

The CDs will not be listed on an organized securities exchange. JPMS and its affiliates may offer to purchase the CDs upon terms and conditions acceptable to them, but are not required to do so. You may not be able to sell your CDs. The CDs are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your CDs to maturity. For more information, see "General Terms of the CDs — Additions and Withdrawals" and "Discounts and Secondary Market" in the accompanying disclosure statement.

- **LIMITATIONS ON FDIC INSURANCE —**

As a general matter, holders who purchase CDs in a principal amount greater than the applicable limits set by federal law and regulation will not be insured by the FDIC for the principal amount exceeding such limit. In addition, under FDIC interpretations, the return on the CDs, which is reflected in the form of the Additional Amount, is not insured by the FDIC until the Observation

Date. Any amounts due on the CDs in excess of the applicable FDIC insurance limits will be subject to the credit risk of JPMorgan Chase Bank. For more information, see “Deposit Insurance” in the accompanying disclosure statement.

- **JPMS’S ESTIMATED VALUE OF THE CDs IS LOWER THAN THE ORIGINAL ISSUE PRICE (PRICE TO PUBLIC) OF THE CDs —**

JPMS’s estimated value is only an estimate using several factors. The original issue price of the CDs exceeds JPMS’s estimated value because costs associated with selling, structuring and hedging the CDs are included in the original issue price of the CDs. These costs include the selling commissions, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the CDs and the estimated cost of hedging our obligations under the CDs. See “JPMS’s Estimated Value of the CDs” in this disclosure supplement.

- **JPMS’S ESTIMATED VALUE DOES NOT REPRESENT FUTURE VALUES OF THE CDs AND MAY DIFFER FROM OTHERS’ ESTIMATES —**

See “JPMS’s Estimated Value of the CDs” in this disclosure supplement.

- **JPMS’S ESTIMATED VALUE IS DERIVED BY REFERENCE TO AN INTERNAL FUNDING RATE —**

The internal funding rate used in the determination of JPMS’s estimated value is based on, among other things, our view of the funding value of the CDs as well as the issuance, operational and ongoing liability management costs of the CDs. Our use of an internal funding rate and any potential changes to these rates may have an adverse effect on the terms of the CDs and any secondary market prices of the CDs. See “JPMS’s Estimated Value of the CDs” in this disclosure supplement.

- **THE VALUE OF THE CDs AS PUBLISHED BY JPMS (AND WHICH MAY BE REFLECTED ON CUSTOMER ACCOUNT STATEMENTS) MAY BE HIGHER THAN JPMS’S THEN-CURRENT ESTIMATED VALUE OF THE CDs FOR A LIMITED TIME PERIOD —**

We generally expect that some of the costs included in the original issue price of the CDs will be partially paid back to you in connection with any repurchases of your CDs by JPMS in an amount that will decline to zero over an initial predetermined period. See “Secondary Market Prices of the CDs” in this disclosure supplement for additional information relating to this initial period. Accordingly, the estimated value of your CDs during this initial period may be lower than the value of the CDs as published by JPMS (and which may be shown on your customer account statements).

- **SECONDARY MARKET PRICES OF THE CDs WILL LIKELY BE LOWER THAN THE ORIGINAL ISSUE PRICE OF THE CDs —**

Any secondary market prices of the CDs will likely be lower than the original issue price of the CDs because, among other things, secondary market prices take into account our internal secondary market funding rates for structured issuances and, also, because secondary market prices (a) exclude selling commissions and (b) may exclude projected hedging profits, if any, and estimated hedging costs that are included in the original issue price of the CDs. As a result, the price, if any, at which JPMS will be willing to buy the CDs from you in secondary market transactions, if at all, is likely to be lower than the original issue price. Any sale by you prior to the Maturity Date could result in a substantial loss to you.

In addition, if JPMS purchases your CDs in the secondary market within six days after their initial issuance, you will be subject to early withdrawal penalties we are required to impose pursuant to Regulation D of the Federal Reserve Board. Under these circumstances, the repurchase price will be less than the original issue price of the CDs.

- **SECONDARY MARKET PRICES OF THE CDs WILL BE IMPACTED BY MANY ECONOMIC AND MARKET FACTORS —**

The secondary market price of the CDs during their term will be impacted by a number of economic and market factors, which may either offset or magnify each other, aside from the selling commissions, projected hedging profits, if any, estimated hedging costs and the level of the Index. Additionally, independent pricing vendors and/or third party broker-dealers may publish a price for the CDs, which may also be reflected on customer account statements. This price may be different (higher or lower) than the price of the CDs, if any, at which JPMS may be willing to purchase your CDs in the secondary market. See “Risk Factors — Risks Relating to the Estimated Value of Secondary Market Prices of the CDs — Secondary market prices of the CDs will be impacted by many economic and market factors” in the accompanying disclosure statement.

Risks Relating to the Index

- **OUR AFFILIATE, JPMS PLC, IS THE INDEX CALCULATION AGENT AND MAY ADJUST THE INDEX IN A WAY THAT AFFECTS ITS LEVEL —**

JPMS plc, one of our affiliates, acts as the index calculation agent and is responsible for calculating and maintaining the Index and developing the guidelines and policies governing its composition and calculation. The rules governing the Index may be amended at any time by JPMS plc, in its sole discretion, and the rules also permit the use of discretion by JPMS plc in specific instances, such as the right to substitute a Basket Constituent. Unlike other indices, the maintenance of the Index is not governed by an independent committee. Although judgments, policies and determinations concerning the Index are made by JPMS plc, JPMorgan Chase Bank, as the parent company of JPMS plc, ultimately controls JPMS plc.

In addition, the policies and judgments for which JPMS plc is responsible could have an impact, positive or negative, on the level of the Index and the value of your CDs. JPMS plc is under no obligation to consider your interests as an investor in the CDs.

Furthermore, the inclusion of the Basket Constituents in the Index is not an investment recommendation by us or JPMS plc of the Basket Constituents or any of the securities, commodities, commodity futures contracts or other assets underlying the Basket Constituents.

- **OWNING THE CDs INVOLVES THE RISKS ASSOCIATED WITH THE INDEX'S MOMENTUM INVESTMENT STRATEGY —**

The Index employs a mathematical model intended to implement what is generally known as a momentum investment strategy, which seeks to capitalize on positive market price trends based on the supposition that positive market price trends may continue. This strategy is different from a strategy that seeks long-term exposure to a portfolio consisting of constant components with fixed weights. The Index may fail to realize gains that could occur as a result of holding assets that have experienced price declines, but after which experience a sudden price spike.

- **THE CDs MAY BE SUBJECT TO INCREASED VOLATILITY DUE TO THE USE OF LEVERAGE —**

As part of the daily dynamic adjustment of its exposure to the synthetic portfolio of Basket Constituents, the Index may have an exposure to the synthetic portfolio of up to 150%. When the volatility of the synthetic portfolio over the relevant measurement period is less than the target volatility of 5%, the Index will employ leverage to increase the exposure of the portfolio, up to 150%. When the synthetic portfolio is leveraged, any movements in the values of the Basket Constituents may result in greater changes in the value of the Basket Constituents than if leverage was not used. In particular, the use of leverage will magnify any negative performance of the Basket Constituents, which, in turn, could affect adversely any payments on the CDs.

- **THE INDEX MAY NOT ACHIEVE ITS TARGET VOLATILITY —**

The exposure of the Index to the synthetic portfolio of Basket Constituents is determined by a two-step process, composed of a monthly selection process to determine the weighting assigned to each Basket Constituent in the synthetic portfolio tracked by the Index and a daily dynamic adjustment of the exposure to the synthetic portfolio intended to achieve a target annualized volatility of 5% on a daily basis. The monthly weights and daily adjustments are based on the historical volatility of the synthetic portfolio over specified measurement periods and are subject to maximum aggregate and individual weighting constraints and minimum and maximum exposure limits. However, there is no guarantee that trends existing in the relevant measurement period will continue in the future. The volatility of the synthetic portfolio on any day may change quickly and unexpectedly. Accordingly, the actual realized annualized volatility of the Index on a daily basis may be greater than or less than 5%, which may adversely affect the level of the Index and the value of the CDs.

- **THE DAILY ADJUSTMENT OF THE EXPOSURE OF THE INDEX TO THE SYNTHETIC PORTFOLIO OF BASKET CONSTITUENTS MAY CAUSE THE INDEX NOT TO REFLECT FULLY ANY PRICE APPRECIATION OR TO MAGNIFY ANY PRICE DEPRECIATION OF THE SYNTHETIC PORTFOLIO —**

As discussed above, in an effort to achieve the target volatility of 5% on a daily basis, the Index adjusts its exposure to the synthetic portfolio of Basket Constituents daily based on the historical volatility of the synthetic portfolio over a specified measurement period, subject to maximum and minimum exposure limits. When the historical volatility is greater than the target volatility, the Index will reduce the exposure to the synthetic portfolio. When the historical volatility is less than the target volatility, the Index will increase the exposure to the synthetic portfolio. The exposure may vary between 0% and 150%. Due to the daily exposure adjustments, the Index may fail to realize gains due to price appreciation of the synthetic portfolio at a time when the exposure is less than 100% or may suffer increased losses due to price depreciation of the synthetic portfolio when the exposure is above 100%. As a result, the Index may underperform a similar index that does not include a daily exposure adjustment feature.

- **THE INVESTMENT STRATEGY USED TO CONSTRUCT THE INDEX INVOLVES MONTHLY REBALANCING AND WEIGHTING CAPS THAT ARE APPLIED TO THE BASKET CONSTITUENTS AND DAILY ADJUSTMENTS TO THE EXPOSURE TO THE SYNTHETIC PORTFOLIO CONSISTING OF THE BASKET CONSTITUENTS —**

The Basket Constituents are subject to monthly rebalancing and maximum weighting caps by asset type and on subsets of assets based on historical volatility and daily adjustments to the exposure to the synthetic portfolio consisting of the Basket Constituents. By contrast, a synthetic portfolio that does not rebalance monthly and is not subject to any weighting caps or daily exposure adjustments in this manner could see greater compounded gains over time through exposure to a consistently and rapidly appreciating portfolio consisting of the Basket Constituents. Therefore, your return on the CDs may be less than the return you could realize on an alternative investment in the Basket Constituents that is not subject to monthly rebalancing, weighting caps or daily exposure adjustments.

- **CHANGES IN THE VALUES OF THE BASKET CONSTITUENTS MAY OFFSET EACH OTHER —**

Because the CDs are linked to the Index, which is linked to the performance of the Basket Constituents, which collectively represent a diverse range of asset classes and geographic regions, price movements between the Basket Constituents representing different asset classes or geographic regions may not correlate with each other. At a time when the value of a Basket Constituent representing a particular asset class or geographic region increases, the value of other Basket Constituents representing a different asset class or geographic region may not increase as much or may decline. Therefore, in calculating the level of the Index, increases in the values of some of the Basket Constituents may be moderated, or more than offset, by lesser increases or declines in the values of other Basket Constituents.

- **SOME OR ALL OF THE INDEX'S BASKET CONSTITUENTS ARE ETFs. THE PERFORMANCE OF EACH ETF'S REFERENCE INDEX AS WELL AS THE RELEVANT ETF'S NET ASSET VALUE PER SHARE (AN "ETF SHARE") MAY NOT CORRELATE WITH THE PERFORMANCE AND MARKET VALUE OF EACH ETF SHARE, PARTICULARLY DURING PERIODS OF MARKET VOLATILITY —**

Each Basket Constituent which is an ETF may not fully replicate the reference index of that ETF and may hold securities different from those included in the reference index. In addition, the performance of the ETF Shares will reflect additional transaction costs and fees that are not included in the calculation of the reference index. All of these factors may lead to a lack of correlation between the performance of the ETF Shares and the reference index. In addition, corporate actions with respect to the equity securities underlying the ETF Shares (such as mergers and spin-offs) may impact the variance between the performances of the ETF Shares and the reference index. Finally, because the ETF Shares are traded on public exchanges and are subject to market supply and investor demand, the market value of one ETF Share may differ from the net asset value per ETF Share.

During periods of market volatility, securities underlying the ETF Shares may be unavailable in the secondary market, market participants may be unable to calculate accurately the net asset value per ETF Share and the liquidity of the ETF Shares may be adversely affected. This kind of market volatility may also disrupt the ability of market participants to create and redeem ETF Shares. Further, market volatility may adversely affect, sometimes materially, the prices at which market participants are willing to buy and sell ETF Shares. As a result, under these circumstances, the market value of the ETF Shares may vary substantially from the net asset value per ETF Share. For all of the foregoing reasons, the performance of the ETF Shares may not correlate with the performance of the reference index as well as the net asset value per ETF Share, which could materially and adversely affect the value of the CDs in the secondary market and/or reduce your payment at maturity.

- **THE INDEX MAY BE PARTIALLY UNINVESTED —**

The aggregate weight of the Cash Constituent at any given time represents the portion of the synthetic portfolio that is uninvested at that time. The Index will reflect no return for any uninvested portion (including any portion represented by the Cash Constituent). While the weight of the Cash Constituent is normally limited by a weighting constraint of 50%, if, as a result of an extraordinary event, any Basket Constituent is replaced with the Cash Constituent, the aggregate weight of the Cash Constituent would be allowed to exceed 50% because a portion of that aggregate weight would be subject to the weighting constraints specific to the replaced Basket Constituent and not the weighting constraints specific to the Cash Constituent. See "The Basket Constituents Composing the Index May Be Replaced by a Substitute ETF or Index" below.

In addition, when the exposure of the Index to the synthetic portfolio of Basket Constituents is less than 100% on any day, a portion of the synthetic portfolio will be uninvested. For example, if the daily exposure is set at 70%, and assuming the weight of the Cash Constituent is 0%, 30% of the synthetic portfolio will be uninvested. The Index will reflect no return for any uninvested portion.

- **HYPOTHETICAL BACK-TESTED DATA RELATING TO THE INDEX DO NOT REPRESENT ACTUAL HISTORICAL DATA AND ARE SUBJECT TO INHERENT LIMITATIONS —**

The hypothetical back-tested performance of the Index set forth under “Hypothetical Back-tested Data and Historical Information” in this disclosure supplement is purely theoretical and does not represent the actual historical performance of the Index and has not been verified by an independent third party. For time periods prior to the launch of an ETF Constituent and that ETF Constituent’s initial satisfaction of a minimum liquidity standard, the hypothetical back-tested performance set forth under “Hypothetical Back-tested Data and Historical Information” in this disclosure supplement was calculated using alternative performance information derived from a related index, after deducting hypothetical fund fees, rather than the performance information for that ETF Constituent.

Alternative modeling techniques or assumptions may produce different hypothetical historical information that might prove to be more appropriate and that might differ significantly from the hypothetical historical information set forth under “Hypothetical Back-tested Data and Historical Information” in this disclosure supplement. In addition, back-tested, hypothetical historical results have inherent limitations. These back-tested results are achieved by means of a retroactive application of a back-tested model designed with the benefit of hindsight. As with actual historical data, hypothetical back-tested data should not be taken as an indication of future performance.

- **THE BASKET CONSTITUENTS COMPOSING THE INDEX MAY BE REPLACED BY A SUBSTITUTE ETF OR INDEX —**

If the index calculation agent determines in its discretion that no suitable substitute ETF or index is available for an affected Basket Constituent (other than the Cash Constituent), then the index calculation agent will replace such Basket Constituent with the Cash Constituent as its substitute. Under these circumstances, the aggregate weight of the Cash Constituent in the Index may be greater than the maximum 50% weight limit allocated to the Cash Constituent because a portion of such aggregate weight would be subject to the separate maximum weight limit specific to the affected Basket Constituent.

- **THE COMMODITY FUTURES CONTRACTS UNDERLYING ONE OF THE BASKET CONSTITUENTS ARE SUBJECT TO UNCERTAIN LEGAL AND REGULATORY REGIMES —**

Legal or regulatory developments affecting the commodity futures contracts underlying one of the Basket Constituents, the iShares® S&P GSCI™ Commodity-Indexed Trust, may result in the index calculation agent exercising its discretionary right to exclude or substitute Basket Constituents or the occurrence of a commodity hedging disruption event or may otherwise adversely affect the value of the CDs. See “ — We May Determine the Additional Amount for Your CDs Early If a Commodity Hedging Disruption Event Occurs” above and “Risk Factors — Risks Relating to the Commodity ETF Constituents” in the accompanying underlying supplement.

- **OTHER KEY RISKS:**

- THE INDEX MAY NOT BE SUCCESSFUL OR OUTPERFORM ANY ALTERNATIVE STRATEGY THAT MIGHT BE EMPLOYED IN RESPECT OF THE BASKET CONSTITUENTS.
- THE INDEX WAS ESTABLISHED ON SEPTEMBER 25, 2012, AND THEREFORE HAS A LIMITED OPERATING HISTORY AND MAY PERFORM IN UNANTICIPATED WAYS.
- THE INDEX COMPRISES NOTIONAL ASSETS AND LIABILITIES. THERE IS NO ACTUAL PORTFOLIO OF ASSETS TO WHICH ANY PERSON IS ENTITLED OR IN WHICH ANY PERSON HAS ANY OWNERSHIP INTEREST.
- THE CDs ARE SUBJECT TO CURRENCY EXCHANGE RISK BECAUSE THE PRICES OF SOME OR ALL OF THE SECURITIES COMPOSING THE iSHARES® MSCI EAFE ETF AND THE iSHARES® MSCI EMERGING MARKETS ETF ARE CONVERTED INTO U.S. DOLLARS FOR PURPOSES OF CALCULATING THE VALUE OF THE RELEVANT BASKET CONSTITUENT.
- AN INVESTMENT IN THE CDs IS SUBJECT TO RISKS ASSOCIATED WITH NON-U.S. SECURITIES MARKETS, INCLUDING EMERGING MARKETS BECAUSE SOME OR ALL OF THE EQUITY SECURITIES THAT ARE HELD BY THE iSHARES® MSCI EAFE ETF AND THE iSHARES® MSCI EMERGING MARKETS ETF HAVE BEEN ISSUED BY NON-U.S. COMPANIES.
- THE CDs ARE SUBJECT TO SIGNIFICANT RISKS ASSOCIATED WITH FIXED-INCOME SECURITIES, INCLUDING INTEREST RATE-RELATED RISKS BECAUSE FIVE OF THE BASKET CONSTITUENTS ARE BOND ETFs THAT ATTEMPT TO TRACK THE PERFORMANCE OF INDICES COMPOSED OF FIXED-INCOME SECURITIES.
- THE CDs ARE SUBJECT TO SIGNIFICANT RISKS ASSOCIATED WITH HIGH-YIELD FIXED INCOME SECURITIES, INCLUDING CREDIT RISK.
- INVESTMENTS RELATED TO THE VALUES OF THE COMMODITIES TEND TO BE MORE VOLATILE THAN TRADITIONAL CD INVESTMENTS.

- o HIGHER FUTURE PRICES OF THE COMMODITY FUTURES CONTRACTS CONSTITUTING THE iSHARES[®] S&P GSCI[™] COMMODITY-INDEXED TRUST RELATIVE TO THEIR CURRENT PRICES MAY DECREASE THE AMOUNT PAYABLE AT MATURITY.
- o RISKS ASSOCIATED WITH THE REAL ESTATE INDUSTRY WILL AFFECT THE VALUE OF YOUR CDs BECAUSE THE iSHARES[®] U.S. REAL ESTATE ETF HOLDS A VARIETY OF REAL ESTATE-RELATED SECURITIES.
- o AN INVESTMENT IN THE CDs IS SUBJECT TO RISKS ASSOCIATED WITH SMALL CAPITALIZATION STOCKS BECAUSE THE EQUITY SECURITIES HELD BY THE iSHARES[®] RUSSELL 2000 ETF AND INCLUDED IN THE RUSSELL 2000[®] INDEX HAVE BEEN ISSUED BY COMPANIES WITH RELATIVELY SMALL MARKET CAPITALIZATION.
- o THE MARKET PRICE OF GOLD WILL AFFECT THE VALUE OF THE CDs.

Please refer to the "Risk Factors" section of the accompanying underlying supplement no. CD-6-I for more details regarding the above-listed risks.

Hypothetical Back-Tested Data and Historical Information

The following graph sets forth the hypothetical back-tested performance of the Index based on the hypothetical back-tested weekly closing levels of the Index from January 7, 2011 through September 21, 2012 and the historical performance of the Index based on the weekly closing levels of the Index from September 28, 2012 through October 21, 2016. The Index was established on September 25, 2012. The closing level of the Index on October 21, 2016 was 224.04. We obtained the closing levels above and below from Bloomberg, without independent verification.

The data for the hypothetical back-tested performance of the Index set forth in the following graph are purely theoretical and do not represent the actual historical performance of the Index. For time periods prior to the launch of an ETF Constituent and that ETF Constituent's initial satisfaction of a minimum liquidity standard, the hypothetical back-tested performance set forth in the following graph was calculated using alternative performance information derived from a related index, after deducting hypothetical fund fees, rather than the performance information for that ETF Constituent. See "Selected Risk Considerations — Hypothetical Back-Tested Data Relating to the Index Do Not Represent Actual Historical Data and Are Subject to Inherent Limitations."

The hypothetical back-tested and historical closing levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the closing level of the Index on the Observation Date. We cannot give you assurance that the performance of the Index will result in a payment at maturity in excess of your principal amount.

**Hypothetical Back-Tested and Historical Performance of the
J.P. Morgan ETF Efficiente® DS 5 Index**

Source: Bloomberg & JPMorgan

The hypothetical back-tested closing levels of the Index have inherent limitations and have not been verified by an independent third party. These hypothetical back-tested closing levels are determined by means of a retroactive application of a back-tested model designed with the benefit of hindsight. Hypothetical back-tested results are neither an indicator nor a guarantee of future returns. No representation is made that an investment in the CDs will or is likely to achieve returns similar to those shown. Alternative modeling techniques or assumptions would produce different hypothetical back-tested closing levels of the Index that might prove to be more appropriate and that might differ significantly from the hypothetical back-tested closing levels of the Index set forth above.

Taxed as Contingent Payment Debt Instruments

You should review carefully the section entitled "Material U.S. Federal Income Tax Consequences," and in particular the subsection thereof entitled "— CDs with a Term of More than One Year," in the accompanying disclosure statement. Unlike a traditional certificate of deposit that provides for periodic payments of interest at a single fixed rate, with respect to which a cash-method investor generally recognizes income only upon receipt of stated interest, the CDs will be treated for U.S. federal income tax purposes as "contingent payment debt instruments." As discussed in that subsection, you generally will be required to accrue original issue discount on your CDs in each taxable year at the "comparable yield," as determined by us, although we will not make any payment with respect to the

CDs until maturity. Upon sale or exchange (including at maturity), you will recognize taxable income or loss equal to the difference between the amount received from the sale or exchange and your adjusted basis in the CD, which generally will equal the cost thereof, increased by the amount of original issue discount you have accrued in respect of the CD. You generally must treat any income as interest income and any loss as ordinary loss to the extent of previous interest inclusions, and the balance as capital loss. The deductibility of capital losses is subject to limitations. **Purchasers who are not initial purchasers of CDs at their issue price should consult their tax advisers with respect to the tax consequences of an investment in CDs, including the treatment of the difference, if any, between the basis in their CDs and the CDs' adjusted issue price.**

Withholding under legislation commonly referred to as "FATCA" may apply to the payment on your CD at maturity, as well as to the gross proceeds of a sale or other disposition of a CD prior to maturity. However, under a recent IRS notice, this regime will not apply to payments of gross proceeds (other than any amount treated as interest) of a sale or other disposition of a CD occurring before January 1, 2019. You should consult your tax adviser regarding the potential application of FATCA to the CDs.

Non-U.S. holders should also note that, notwithstanding anything to the contrary in the accompanying disclosure statement, recently promulgated Treasury regulations imposing a withholding tax on certain "dividend equivalents" under certain "equity linked instruments" will not apply to the CDs.

Comparable Yield and Projected Payment Schedule

We have determined that the "comparable yield" is an annual rate of 1.29% compounded semiannually. Based upon our determination of the comparable yield, the "projected payment schedule" per \$1,000 CD consists of a single payment at maturity, equal to \$1,094.12. Assuming a semiannual accrual period, the following table states the amount of OID that will accrue with respect to the CDs during each calendar period, based upon our determination of the comparable yield and the projected payment schedule.

Calendar Period	Accrued OID During Calendar Period (Per \$1,000 CD)	Total Accrued OID from Original Issue Date (Per \$1,000 CD) as of End of Calendar Period
Original Issue Date through December 31, 2016...	\$2.22	\$2.22
January 1, 2017 through December 31, 2017...	\$12.97	\$15.19
January 1, 2018 through December 31, 2018...	\$13.14	\$28.33
January 1, 2019 through December 31, 2019...	\$13.31	\$41.64
January 1, 2020 through December 31, 2020...	\$13.48	\$55.12
January 1, 2021 through December 31, 2021...	\$13.66	\$68.78
January 1, 2022 through December 31, 2022...	\$13.83	\$82.61
January 1, 2023 through October 26, 2023...	\$11.51	\$94.12

Neither the comparable yield nor the projected payment schedule constitutes a representation by us regarding the actual Additional Amount, if any, that we will pay on the CDs. The amount you actually receive at maturity or earlier sale or exchange of your CDs will affect your income for that year, as described above under "— Taxed as Contingent Payment Debt Instruments."

JPMS's Estimated Value of the CDs

JPMS's estimated value of the CDs set forth on the cover of this disclosure supplement is equal to the sum of the values of the following hypothetical components: (1) a fixed-income component with the same maturity as the CDs, valued using an internal funding rate, and (2) the derivative or derivatives underlying the economic terms of the CDs. JPMS's estimated value does not represent a minimum price at which JPMS would be willing to buy your CDs in any secondary market (if any exists) at any time. The internal funding rate used in the determination of JPMS's estimated value is based on, among other things, our view of the funding value of the

CDs as well as the issuance, operational and ongoing liability management costs of the CDs. For additional information, see “Selected Risk Considerations — JPMS’s Estimated Value Is Derived by Reference to an Internal Funding Rate.”

The value of the derivative or derivatives underlying the economic terms of the CDs is derived from JPMS’s internal pricing models. These models are dependent on inputs such as the traded market prices of comparable derivative instruments and on various other inputs, some of which are market-observable, and which can include volatility, dividend rates, interest rates and other factors, as well as assumptions about future market events and/or environments. Accordingly, JPMS’s estimated value of the CDs is determined when the terms of the CDs are set based on market conditions and other relevant factors and assumptions existing at that time.

JPMS’s estimated value of the CDs does not represent future values of the CDs and may differ from others’ estimates. Different pricing models and assumptions could provide valuations for the CDs that are greater than or less than JPMS’s estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the CDs could change significantly based on, among other things, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which JPMS would be willing to buy CDs from you in secondary market transactions.

JPMS’s estimated value of the CDs is lower than the original issue price of the CDs because costs associated with selling, structuring and hedging the CDs are included in the original issue price of the CDs. These costs include the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the CDs and the estimated cost of hedging our obligations under the CDs. Because hedging our obligations entails risk and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or it may result in a loss. A portion of the profits, if any, realized in hedging our obligations under the CDs may be allowed to other affiliated or unaffiliated dealers, and we or one or more of our affiliates will retain any remaining hedging profits, if any. See “Selected Risk Considerations — JPMS’s Estimated Value of the CDs Is Lower Than the Original Issue Price (Price to Public) of the CDs” in this disclosure supplement.

Secondary Market Prices of the CDs

For information about factors that will impact any secondary market prices of the CDs, see “Risk Factors — Risks Relating to the Estimated Value and Secondary Market Prices of the CDs — Secondary market prices of the CDs will be impacted by many economic and market factors” in the accompanying disclosure statement. In addition, we generally expect that some of the costs included in the original issue price of the CDs will be partially paid back to you in connection with any repurchases of your CDs by JPMS in an amount that will decline to zero over an initial predetermined period. These costs can include projected hedging profits, if any, and, in some circumstances, estimated hedging costs and our internal secondary market funding rates for structured issuances. This initial predetermined time period is intended to be the shorter of six months and one-half of the stated term of the CDs. The length of any such initial period reflects the structure of the CDs, whether our affiliates expect to earn a profit in connection with our hedging activities, the estimated costs of hedging the CDs and when these costs are incurred, as determined by JPMS. See “Selected Risk Considerations — The Value of the CDs as Published by JPMS (and Which May Be Reflected on Customer Account Statements) May Be Higher Than JPMS’s Then-Current Estimated Value of the CDs for a Limited Time Period.”

Supplemental Use of Proceeds

The CDs are offered to meet investor demand for products that reflect the risk-return profile and market exposure provided by the CDs. See “Hypothetical Payout Profile” and “How the CDs Work” in this disclosure supplement for an illustration of the risk-return profile of the CDs and “The J.P. Morgan ETF Efficiente[®] DS 5 Index” in this disclosure supplement for a description of the market exposure provided by the CDs.

The original issue price of the CDs is equal to JPMS’s estimated value of the CDs plus the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, plus (minus) the projected profits (losses) that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the CDs, plus the estimated cost of hedging our obligations under the CDs.

Supplemental Plan of Distribution

We expect that delivery of the CDs will be made against payment for the CDs on or about the settlement date set forth on the front cover of this disclosure supplement, which is the fifth business day following the pricing date of the CDs (this settlement cycle being referred to as T+5). Under Rule 15c6-1 under the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in three business days, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade CDs on the pricing date or the succeeding business day will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement and should consult their own advisors.

Additional Terms Specific to the CDs

You should read this disclosure supplement together with the disclosure statement dated January 29, 2015 and underlying supplement no. CD-6-I dated December 7, 2012. This disclosure supplement, together with the documents listed below, contains the terms of the CDs and supersedes all other prior or contemporaneous oral statements as well as any other written materials, including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours and, to the extent of any inconsistency, any certificate of deposit disclosure statement produced and furnished by any unaffiliated dealer. You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying disclosure statement and “Risk Factors” in the accompanying underlying supplement, as the CDs involve risks not associated with conventional certificates of deposit. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the CDs.
